WORK
your
WAY

mySortimo.com

Meeting the challenges of tomorrow today.

This basic idea and a blue metal case were the start of the Sortimo system more than 45 years ago.

From the very beginning, the company founder, Herbert Dischinger, drove forward the innovative idea of an organisational system. The Sortimo product portfolio was further developed around the insetboxes and the metal case and quickly made Sortimo the world leading provider of van racking and load securing systems.

Well thought-out ergonomics, the best possible safety, outstanding quality and a long service life are properties that have characterised our products in tough day-to-day work for years.

These days, Sortimo is no longer just a manufacturer of van racking systems, but also offers a full-service concept with the *mySortimo* platform. This offers far more than just individual and turnkey mobility solutions for light commercial vehicles, and adds value to the Sortimo product range, making procurement as simple as possible.

#work your way!

mySortimo.com provides 24-hour availability of all Sortimo products and other services. You can equip your commercial vehicle with van racking systems online, create decals and generate a complete mobile organisational system in the form of adhesive labels and custom foam inserts. And all with full price transparency. If you require any support, the Sortimo Customer Service Centre can help, as can our Sortimo branches and local stations.

See for yourself at mySortimo.com!

mySortimo account

Your advantages

Benefit from setting up your own account showing content individually tailored to you, which you can use to make your day-to-day work even more efficient.

- › Useful tips for your light commercial vehicle
- › Online vehicle management
- › Save individual vehicle configurations
- › Order directly with installation service and preferred appointment options
- › Best price online

Increase your productivity during your working day with the support of mySortimo.

Cost control and time savings

Save yourself long procurement channels through various service providers by taking advantage of our comprehensive offer and getting exactly what you need 24 hours a day, thanks to our full-service concept.

The *mySortimo* platform lets you retain full cost control of your van racking and decal configurations as you can see the price at any point in the configuration, which allows you to plan your expenditure fully in line with your budget.

Quality

MADE IN GERMANY

We supply our customers worldwide from our only production facility in Zusmarshausen in Bavaria.

In spite of our global market focus, we are proud of our home town of Zusmarshausen as it offers us a number of key benefits: Our production workflows are lean and our technical staff are highly qualified. Thanks to the short processes involved, we can continuously optimise our products and guarantee a consistent flow of information.

Our expertise ensures that the innovations and system solutions created here cannot be copied – let alone with that “Made in Germany” quality.

Sortimo product lines also carry the TÜV seal for tested quality and have successfully undergone crash testing.

Tailored solutions

Our diverse portfolio offers industry-specific and tailored solutions to provide even more efficiency in your day-to-day work.

Whether van racking systems, vehicle decals or organisers from our range of accessories – with Sortimo products and services you can structure your vehicle to meet your specific requirements and use it in the best possible way.

The organisational system for maximum productivity.

SR5

ONLINE CONFIGURATION
at any time and with all the benefits
of the *mySortimo* platform.

HIGHEST PRODUCTIVITY
through workflow optimisation
and 5S.

TRIED AND TESTED QUALITY
maximum safety and durability.

MAXIMISED LOADING SPACE
through flexible installation options.

SR5 – The organisational system for maximum productivity.

You can't get any more productive

SR5 is the 5th generation of the Sortimo van racking system and is the result of more than 45 years of experience in the organisation and equipping of light commercial vehicles.

As a pioneer in van racking systems, our product is synonymous with safety, sophisticated ergonomics, quality and durability.

In the age of change characterised by digitalisation, skilled labour shortage and Industry 4.0, efficiency and productivity are still our primary goals. Our aim is to avoid compromise in the optimisation of working processes and, at the same time, handle our existing resources with care.

To meet these requirements, drawing on all our experience and passion, we have developed a system that is more than just van racking and an organisational system. A system that is designed for perfect workplace organisation in the tightest of spaces. It is about maximum space utilisation coupled with clear layout and quick access to the required inventory in the vehicle.

We have placed the workflow of our customers at the core of our developments and have incorporated modern methods of workplace structuring, such as "5S". We are proud of the outcome and we are looking forward to presenting the various diverse opportunities of the SR5 to you.

Get to know SR5 and maximise the opportunities offered by the system to continuously optimise your processes.

Labelling from page 287

SR5 – The organisational system for maximum productivity.

Compatible with proven and established systems – the Sortimo EcoSystem

Every handle has to fit. Everything fits together. This requires integration beyond the limits of the system.

The symbol of this is the L-BOXX, which is fully compatible with the entire Sortimo product range, and also with SR5 of course. In addition, manufacturers and retailers in virtually all sectors use the L-BOXX as packaging for tools and consumables. The Sortimo plastic slides fix the L-BOXX in place securely, problem-free and safely. Existing ranges and machines in the L-BOXX can thus be integrated into the vehicle using plug-and-play.

Other manufacturers provide full compatibility with SR5 with their cases, too. For example, the new Hilti case can be integrated in the SR5 van racking system using the plastic slides. For this cooperation, we have taken out patents because the benefits for our customers are clear and paramount.

The working processes associated with light commercial vehicles naturally include professional load securing. At Sortimo this is called "ProSafe". It is the only load securing system that systematically works using the original lashing points of light commercial vehicles, on individual floor lashing points or wall rails, and also integrated in the van racking or roof racking system. So it's no wonder the SR5 also remains fully compatible with ProSafe.

Take advantage of this too – SR5 adapts to your environment and systems, and also ensures consistency in your work processes.

**ProSafe – also compatible with
the original lashing points of the
vehicle manufacturers!**

**More BOXXes and cases
from page 147**

SR5 – The most important components at a glance

Long components tray

The long components tray can be used for the safe storage of long objects, such as pipes, cable ducts, straightedges and much more. Opening the rear section allows the contents to be simply removed at the rear.

SR-BOXX

SR-BOXEs are ideal for stowing small components or tools. The BOXEs can be integrated on, and under, the shelves in the van racking using the plastic slides. An optional cover protects them from dust and dirt in the vehicle and on the building site.

SR drawer

Representing an innovative alternative to a drawer, the SR drawer offers the tried-and-tested Sortimo SR drawer function, but can be removed completely at any time. Dividers and insetboxes provide a wide range of organisational options.

Case fixation

Provides a secure hold for any tool box and can be positioned with one hand.

Mobile sorting

Our cases and BOXEs are the ideal solution for everything that needs to be taken from your vehicle to the building site and back to the workshop tidily and securely. Tools in other manufacturers L-BOXEs, including Bosch or the Hilti case (size 20), can be safely stowed using the Sortimo plastic slide.

Base flap/base plinth

The base flap and base plinth allow large or odd-shaped items to be stowed away safely. With its folding front, the base flap additionally offers the advantage of convenient access to the contents. The base flaps and base plinths can be fitted in different depth positions, depending on whether you need more storage space or more clearance in the centre aisle.

ProSafe

The only integrated load securing system for light commercial vehicles with lashing points and rails in the floor and on the wall, roof rack system and compatibility with the vehicle's original lashing points, is naturally also integrated in SR5.

**Floors and wall claddings
from page 68**

mySortimo labels

Organising your loading space is perfected using labelling with Sortimo colour code. A key aspect for efficient working.

Shelves

The shelf is available in various different versions: Front open for BOXEs with a low or high edge (H2 = 34 mm, H4 = 68 mm) or optionally with a flap. All shelves can be fitted with SR-BOXEs. The positioning of the shelves can be varied to the back or front. In this way, the SR5 shelf can be matched to the contour of the vehicle leaving room between the shelves for the load and freedom of movement. Use of the roof area, otherwise hardly used, is maximised.

Universal cabinet

The universal cabinet offers lots of storage space for all kinds of objects. The large door provides an unlimited view and easy access to the contents thanks to its wide opening angle. A lever lock is used to lock the door. Optional shelves create additional intermediate levels inside the cabinet.

Drawers

The full extension of the drawers provides the best overview and quick access to tools, screws and spare parts. Extremely sturdy, thanks to the anodised aluminium front, like all SR5 elements.

Side profile

The basis of each SR5 shelf offers maximum payload and load space on the floor of the vehicle on account of its sturdy compact construction, providing for a quick overview and improved access to the shelves.

Side profile accessories

SR5 accessories offer practical solutions for every industry and the most diverse requirements. The screwing position can be varied so that it is at the desired height.

MultiSlide

The MultiSlide, with its full extension, is the perfect solution if you want to access the contents of BOXEs and cases without having to take them out of the van racking. The tray offers space for all T-, L-, LS-, and LT-BOXEs, as well as the metal cases. Cases that do not belong to this system can also be stowed away here. Spacer clips designed for flexible positioning prevent cases from slipping about.

SoboPro

The installation and load securing floor, with its integrated ProSafe floor lashing points, offers various opportunities for load securing. At the same time, the most common SR5 configurations can be installed by plug-and-play.

SR5 – Simply configure online.

The new mySortimo configuration van racking configurator lets you create your own SR5 configurations in just a few steps. Either to simply get to know the possibilities with SR5 in interactive 3D, or even to order it directly via the mySortimo platform,

you can give the configurator a try yourself:

www.mySortimo.com/configurator

After selecting the vehicle, the configurator offers two options to get started: individually from scratch or with a suggestion based on your entries and requirements.

The actual configuration is done in 4 simple steps during which you customise the van racking system and select your preferred options.

Take advantage of the comprehensive benefits of our mySortimo platform:

- **Best Price Online** – we also benefit from automatic processes on our platform. These savings are handed on to you with great discounts on our regular list prices.
- **Price transparency** – you retain a full overview of the current costs, including installation, at all times during configuration.
- **Storage and permanent access** to the configuration and immediate ordering is possible.
- **Appropriate additional offers**, tailored to your requirements, and everything from a single supplier without the need to consult third parties.
- **Comprehensive and interactive explanations** of our products during configuration.

Maximised loading space – Space exactly where you need it

The loading space of the vehicle is ideally used with the SR5 concept. The compact side profiles require considerably less space than the frame construction of conventional van racking systems. Variation in the component depths and installation position means that the van racking system ideally adapts to the contour of the vehicle.

Installation of the components offset to the middle of the vehicle means that the SR5 shelf ideally adapts to the contour of the vehicle. The entire depth of the shelf is retained and the roof area in the vehicle is utilised to best advantage.

The reduction in component height at the top means that the components are still aligned in the direction of the middle of the vehicle. The advantage of this version is that the van racking system can still be used as a location for panel materials among other things. ProSafe lashing rails provide support surfaces and lashing options.

The slim structure means that valuable space remains fully available on the floor of the vehicle – for example for the transport of a Euro pallet.

Maximised loading space

Maximised loading space – More content with reduced space requirement

The functionality of the suspended SR-BOXes is unique in van racking systems. The number of BOXes per shelf can thus be doubled in this way and even open shelves with edge can be loaded with SR-BOXes. The space available on the shelf is maximised!

The plastic slides on the top and bottom of the shelves allow the BOXes to be simply pulled out for easy access to the contents, or for complete removal of the BOXes by lifting them slightly.

Labelling from page 287

Vehicle organisation – A place for everything

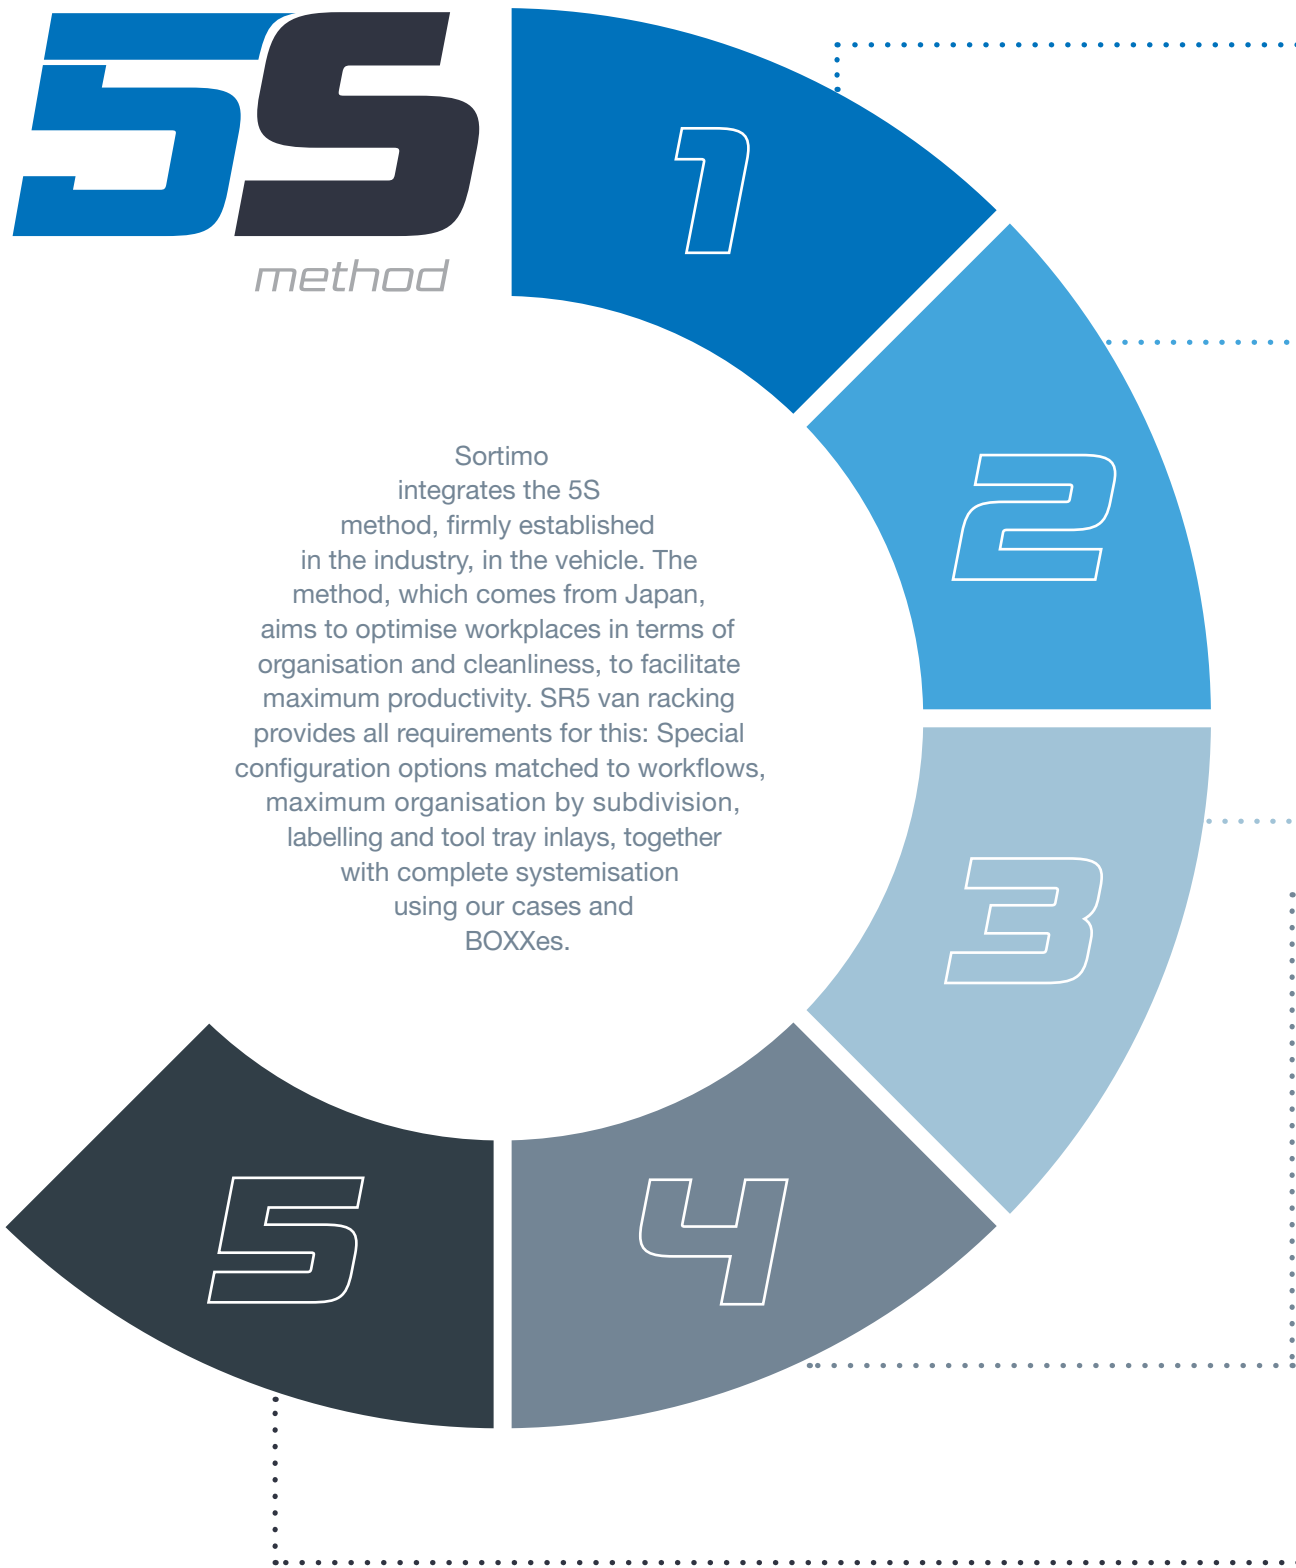

Adhesive labels, dividers and inlays minimise searching and access times in day-to-day working: increasing productivity and efficiency.

SR5 – Increased productivity with 5S

Sortimo integrates the 5S method, firmly established in the industry, in the vehicle. The method, which comes from Japan, aims to optimise workplaces in terms of organisation and cleanliness, to facilitate maximum productivity. SR5 van racking provides all requirements for this: Special configuration options matched to workflows, maximum organisation by subdivision, labelling and tool tray inlays, together with complete systemisation using our cases and BOXXes.

1. Sort

Storage space and payloads are limited, particularly in your vehicle. Another reason to transport just the things you actually need. SR5 van racking provides a comprehensive overview in the vehicle and helps to identify tools or small components and organise them if required. This makes more space available for transport and also reduces fuel consumption of the vehicle as a result of the reduced overall weight.

2. Set in order

Work processes can be optimised by systematic organisation in the vehicle, minimising search and access times. Sophisticated arrangement of the objects helps with efficient access to the contents. For example, we can eliminate the need to enter the vehicle by placing frequently needed objects close to the vehicle doors. The use of tool tray inlays ensures that everything has its own space and the two-colour arrangement means that a missing tool becomes immediately apparent.

3. Shine

Cleanliness in the vehicle reduces the time it takes you to access the contents and simultaneously increases safety at work. In addition, this is the best way of promoting your working methods to your customers. Unlike an untidy vehicle, structured organisation in the SR5 van racking makes it possible to clean the load area simply and without the need for time-consuming clearing out. Including your vehicle's interior in regular vehicle maintenance definitely pays off.

4. Standardise

Set standards in your vehicle and workshop! Sortimo offers the right solution! The use of colour codes shows where things belong at a glance. You can decide yourself how to structure your system: Allocate colours according to the type of content (e.g. tools, consumables etc., or screws, plugs etc.), according to vehicle or employee, or also according to your individual system – however you need it to suit your method of working! The consistent use of standard cases and BOXXes also makes it possible to standardise and ensure that everything fits together! For example, the L-BOXX is a packaging solution for tools and consumables widely used in the marketplace. Sortimo's versatile individual solutions make it possible to standardise virtually all your materials and tools from a packaging point of view and thus benefit from the advantages in transport and working.

5. Self-discipline

Matching SR5 van racking to your workflows gives you the best prerequisites for maintaining order and cleanliness in your vehicle. Continuous improvement forms part of the 5S method. For this reason, the workflows always need to be critically scrutinised to maximise any potential for improvement. The flexibility of the SR5 van racking system enables numerous customisation options. The quick adapter can be used to convert individual components flexibly and easily, enabling you to keep up with the changing requirements of your working environment.

The lightweight drawer for the SR5

SR drawer

- convenient access thanks to pull-out function
- flexible subdivision using dividers or insetboxes
- easy removal of the entire SR drawer
- optimum workplace organisation using mySortimo labels

The SR drawer is an inexpensive alternative to the standard drawer. Plastic slides form the interface to the SR5 van racking system and, by pulling out, enable convenient access to the contents. The SR drawer can be completely removed from the van racking system by lifting it up. The interior can be subdivided using dividers, but is also ideal for use with insetboxes.

Product	Technical details	Description	Article no.	Price
SR drawer 34-8	Dimensions: 693 x 356 x 136 mm Weight: 3.66 kg	For SR5 van racking of width 3. Plastic slides and mounting material included in delivery.	1000012242	49.00 EUR
SR drawer 44-8	Dimensions: 940 x 356 x 136 mm Weight: 4.89 kg	For van racking of width 4. Plastic slides and mounting material included in delivery.	1000012243	54.00 EUR

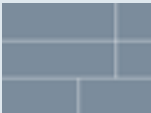

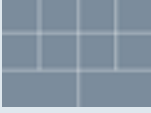

Dividers for SR drawer

The width of the SR drawer can be divided up into individual areas using dividers. The positions of the dividers can be varied according to the space requirements.

Product	Technical details	Description	Article no.	Price
Divider set SRS 04-8	Dimensions: 288 x 114 x 1 mm Weight: 0.13 kg	Consisting of 1 x divider incl. divider holder.	1000013280	6.90 EUR

Insetboxes

Insetboxes permit small components to be transported within the SR drawer securely and tidily. Integrated divider guides, in conjunction with the dividers included in the set, provide additional subdivision options, making them even more flexible and efficient.

Product description		Article no.	Price
	 Insetbox set 6 pcs. H95 SR5 Dimensions (WxDxH): 418 x 286 x 95 mm Weight: 1.08 kg 6-12 subdivision options for height 95 (2 x IB 1.5x4, 2 x IB 2x2, 2 x IB 2x6, 2 x DI IB 1.5x4, 2 x DI IB 1x0, 2 x DI IB 2x0).	1000012905	23.50 EUR

SR5 accessories – Useful extensions for the van racking system

SR5 accessories – Insetboxes

The insetboxes provide for greater productivity in day-to-day work, as they provide a quick overview of the small parts contained inside, but you can also remove them directly from the cases and BOXXes and use them on site. Any missing or almost depleted stock levels are immediately identified, avoiding down times. Whether in the workshop, in Sortimo cases and BOXXes, the WorkMo or the Sortimo van racking system – insetboxes, available in a range of different sizes, enable you to equip yourself to meet individual requirements. Thanks to their integral divider guide, they can also be very individually subdivided, making them even more flexible and efficient in day-to-day work. Together with mySortimo labels, they facilitate professional, systematic and individual workplace organisation.

Insetbox sets for drawers 24-6

For drawer width 2 (46 cm) height 6 (10 cm). Multiple insetboxes can be used for wider drawers.

Product	Technical details	Description	Layout	Article no.	Price

SR5 accessories – Dividers

Shelves and drawers can be subdivided into individual sections using dividers. The positions of the dividers can be varied according to the space requirements of the individual contents. The organisational system is ideally enhanced by adhesive *mySortimo* labels. The material is clearly categorised using colour codes and an empty section can be restocked easily, thanks to the labels.

Dividers for shelves

Subdivision of SR5 shelves widthways. Flexibly positionable.

Product	Technical details	Description	Article no.	Price
Divider FB 03-6 SR5	Dimensions: 218 x 0 x 81 mm	Aluminium divider for SR5 shelves 03-6.	1000012290	6.55 EUR

Dividers for drawers SR5

Systematic organisation

The drawers can be subdivided into individual sections using dividers. The positions of the dividers can be varied according to the space requirements and optimally supplemented with insetboxes. The combination with Gedore tool tray inlays in an insetboxes grid is equally possible as the custom equipment with configurable foam inserts from the mySortimo inlay service.

Divider positions

The following illustrations show the divider positions and possible combinations with insetboxes in the respective drawer sizes.

SR5 accessories – Side profile extensions

The functionality of the SR5 van racking system can be extended using accessories for the side profiles. Various storage pockets and holders and a complete workbench are available to expand the vehicle into a fully functioning mobile workplace.

More accessories from page 111

	Product description	Article no.	Price
	Storage pocket 04-7 SR5 Dimensions (WxDxH): 142 x 352 x 123 mm Weight: 0.8 kg Creates additional stowage space on the side profile of the SR5 van racking system. With integrated tool clamping strip for stowing screwdrivers, pliers and much more.	1000012211	28.90 EUR
	Document compartment 04-12 SR5 Dimensions (WxDxH): 99 x 356 x 203 mm Weight: 0.8 kg Suitable for documents of all types up to A4 size. Can be installed at any height on the side profile.	1000012208	16.50 EUR

	Product description	Article no.	Price
	Hook strip 04 SR5 Dimensions (WxDxH): 98 x 355 x 90 mm Weight: 1.17 kg Strip with three hooks for stowing cables, clothing etc. on the side profiles of the SR5 van racking system.	1000012210	27.10 EUR
	Lashing rail 04-3 SR5 Dimensions (WxDxH): 36 x 345 x 90 mm Weight: 0.7 kg Interface to ProSafe load securing system. Secure fixing of load on the SR5 van racking with lashing belts or elastic cords.	1000012209	23.30 EUR
	Hose holder, medium SR5 Dimensions (WxDxH): 119 x 266 x 201 mm Weight: 1.34 kg Organised and safe transport of cables and hoses on the side profile of the SR5 van racking. Convenient and quick access also from outside the vehicle.	1000012207	44.40 EUR
	Paper towel dispenser SR5 Dimensions (WxDxH): 151 x 34 x 160 mm Weight: 1.67 kg A clean cloth for cleaning your hands or tools always at hand. Cover prevents undesirable unrolling.	1000012206	41.90 EUR

	Product description	Article no.	Price
	Hinged workbench 100 SR5 Dimensions (WxDxH): 810 x 260 x 210 mm Weight: 14.5 kg Hinged workbench with parallel vice. The working height of the workbench varies according to the loading edge of the vehicle. Worktop dimensions 195 x 583 x 30 mm.	1000012749	459.00 EUR

The proven standard

Globelyst4

SYSTEM COMPATIBILITY
with the entire Sortimo BOXXes
range including SR-BOXX

FLEXIBLE
equipping of the aluminium side
wall with accessories as required

SAFE
ProSafe load securing system can be inte-
grated into the entire van racking system

UNIQUE
ingenious built-in components
such as the lifting flap

Globelyst4 – Core features at a glance

Ingenious

Built-in components

Long components tray

For stowing long objects such as pipes, cable ducts, straightedges and much more. Easy to take out from the rear by opening the rear section.

Universal cabinet

Offers storage space for objects of all kinds. Optional shelves create additional intermediate levels within the cabinet which can be adapted to the contents.

Drop-down front

Prevents loads on shelves or on the floor from falling. The front can be easily folded by lifting it up gently.

Lifting flap

One-hand operation thanks to cylinder-supported lift function. After opening, the complete loading height is available for loading and unloading.

Worktop

The installation of a worktop creates a complete workstation in the vehicle. The alu-upstand prevents small components and tools from falling off. The sturdy Multiplex top can optionally be equipped with a parallel vice.

Hinged workbench

In combination with the parallel vice, the hinged workbench enables simple assembly work to be carried out directly at the vehicle.

Globelyst4 – Core features at a glance

Full System compatibility

L-BOXX

Use all L-BOXXes on the plastic slides of the shelves, including from other manufacturers such as Bosch or Hilti (case size 20)

SR-BOXX

Integration of the new SR-BOXXes with transparent lid including dosing flap on shelves.

T-BOXX

Securely stow T-BOXXes on the case rail.

Metal cases

Convenient access to the metal case or other BOXXes via the case tray.

Cases and BOXXes from page 147

Globelyst4 – Core features at a glance

Perfect Load securing

ProSafe

Can be integrated throughout in uprights, traverse frames, lashing rails and floor lashing points. This makes load securing easy and convenient to implement.

WorkMo Fix

The ideal load securing package for the mobile workplace in the vehicle with Sortimo installation floor.

Case fixation

Provides a secure hold for any tool box and can be positioned with one hand.

The flexible racking system

FR5

FOLDING SHELVES
with convenient one-handed operation

EXTEND USE
with BOXX integration

OPTIMUM USE OF LOADING SPACE
thanks to custom design

INCREASED EFFICIENCY
through ergonomic workplace

FR5 – The flexible racking system

Flexible and customised space utilisation:

Shelves adjustable in 3 dimensions:

- height (1)
- horizontally towards the vehicle wall (2)
- inclination via lateral stop strap (3)

Flexible side and intermediate profiles:

- can be adapted to the shape of the vehicle (4)

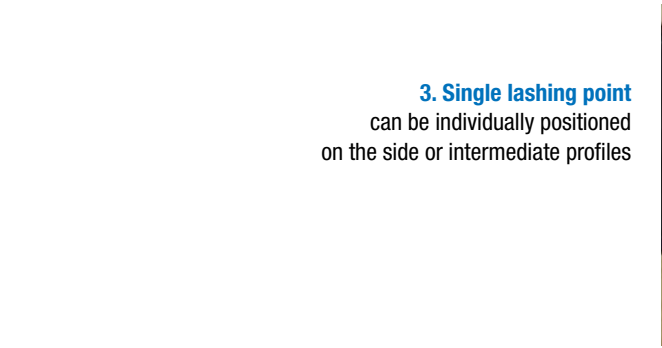

» Maximum use of space with the greatest possible freedom of movement, increase productivity and efficiency in the daily work routine (of the delivery agent).

Ergonomics and protection through the integrated ProSafe load securing system:

- 1. Traverse frame**
permitting lashing over the full shelf width
- 2. Lashing rail**
perfect stopper for cargo on the vehicle floor

- 3. Single lashing point**
can be individually positioned on the side or intermediate profiles

- 4. Lashing rails**
for additional load securing options on the ProPartition

- 5. Restraint poles**
for form-fit securing of large or bulky cargo

Additional accessories for load securing from page 97

FR5 – The flexible racking system

- Very user-friendly through convenient one-handed operation
- Space for bulky items thanks to folding shelves
- Secure storage and fast access to packages with the loading space neat and tidy
- Long service life and high load capacity thanks to quality materials

Smart solutions for shelves

The shelves fold down steplessly in a single movement and are held in the required position with side stop straps.

- **GripMaxx shelf with integrated anti-slip edge** (1)
Enables quick and safe removal of packages thanks to direct access
- **Shelf without border** (2)
Designed for Sortimo BOXXes programme
- **Shelf with low border (34 mm)** (3)
Closed shelf for small items and lightweight cargo
- **Shelf with high border (68 mm)** (4)
Closed shelf for storing larger items

ProPartition – Innovative partition with integrated sliding door

- Time saved thanks to direct access to loading space from driver's cab
- Greater safety through short, safe distances in the vehicle
- Retention of original lashing points for load securing
- Safety at work thanks to flat door threshold and edge protection

FR5 – The flexible racking system

SR5 offers you organised flexibility!

**Configurable by your
personal contact**

Besides the many benefits for the courier, express and package sector, FR5 has yet another unique benefit to offer!

The integration of both suspended and standing BOXXes allows the FR5 to transform from a flexible folding rack into a fully-fledged van racking system for tradespeople from every industry. It lets them safely transport tools, small parts and BOXXes in a well-organized manner at all times. Combining FR5 with SR5 will open up all options to you in your loading space.

- All shelves from the SR5 portfolio can also be configured in FR5
- BOXXes can be integrated suspended or standing
- Open shelves with border (height 2 and 4) can be labelled with mySortimo labels
- Individual sectioning with dividers
- Matching tool mats to protect racking and contents

Perfect synergy from full-featured van racking and optimum utilisation of storage space coupled with maximum flexibility in your work routine.

You can optimise your organised vehicle cargo space for maximum storage in next to no time.

There are no longer any limits here, whether during or outside working hours.

A new level of storage space

Jumbo-Unit

HIGH PAYLOAD
up to 100 kg

FLEXIBLE TO USE
as underfloor solution or free-standing

PERFECT ERGONOMICS
convenient access to contents
thanks to its pull-out function

ROBUST
solid construction with durable,
sturdy operating elements

Jumbo-Unit – A new level of storage space

The Jumbo-Unit is a compact XL drawer, which is ideal for rapid and secure stowage of heavy equipment and bulky materials. It has a load capacity of up to 100 kg, thanks to the extremely strong telescopic slides. The large drawer front guarantees its ease of use and quick access to contents, even when wearing work gloves. Depending on requirements, the Jumbo-Unit can be used as an underfloor or stand-alone solution. The stand-alone version of the Jumbo-Unit can either be equipped with a SoboGrip ProSafe topper or a covering tray. Jumbo-Units of the same size can also be installed one above the other to create more storage space.

Jumbo-Unit – A new level of storage space

Covering trays

The robust covering tray expands the storage space of the Jumbo-Unit, giving it new loading options. It is installed on the Jumbo-Unit and can be further subdivided using dividers. The lateral integrated lashing points can be used to secure the load inside. The Jumbo-Unit thus allows small components to be transported as well as heavy equipment or bulky materials.

Toppers

The SoboGrip topper is fitted onto the Jumbo-Unit, extending the loading area. ProSafe floor lashing points are incorporated in the topper, which ensure professional and rapid load securing in the shortest possible time. The SoboGrip surface is extremely durable and dirt-resistant. The topper has a load capacity of up to 100 kg and can be walked on.

Installation – Load securing – Loading space protection Floor and wall claddings

Protect the cargo area
from wear and damage

Lashing possibilities
for professional load securing

Ideal combination with SR5
through integrated mounting points

Easy-care, sturdy
and easy to clean

Installation and load securing floors

Floor and wall claddings represent the basis of professional vehicle equipment. Sortimo offers the right solution with the vehicle-specific sets in various different designs for any application. This includes our own consistently integrated and developed ProSafe load securing system, which facilitates diverse solutions for load securing. Sortimo floor and wall cladding contributes significantly to the value retention of your vehicle. They protect the chassis from damage and can be removed without leaving any residues if necessary.

SoboGrip

Sturdy installation floor with non-slip coating for alternating types of load.

SoboPro

Load securing floor with lashing points for SR5 van racking and additional lashing options.

from Page 78
SoboPro LSC

Load securing floor with lashing points for SR5 van racking and additional floor lashing points for restraint poles.

SR5

Original lashing points remain available using the lashing points integrated flush in the floor, and are compatible with ProSafe.

Installation and load securing floor

- made from Scandinavian birch
- 9 mm thick, 7-fold bonding
- extremely scratch and impact resistant
- moisture-resistant
- hygienic, non-slip and highly wear-resistant surface covering
- aluminium protective edges on entry sides
- integrated lashing points for SR5 van racking with SoboPro floors
- tailor-made for the vehicle
- no drilling of the vehicle chassis required

Maximum utilisation of the load area in the vehicle with SoboPro and SR5 van racking

SoboPro

The SoboPro installation floor permits simple and quick mounting of the Sortimo van racking system SR5 in the vehicle without having to drill through the vehicle chassis, thanks to the integrated attachment points. The van's standard lashing points can still be used for this. The SoboPro installation floor has additional lashing points alongside the pre-configured lashing points. This results in an innovative and professional load-securing concept which permits flexible lashing of loads to the floor. The floor lashing points are arranged in such a way that the valuable storage space on the floor of the vehicle itself, combined with the installation of SR5 van racking, can be utilised in an ideal manner.

Load securing as standard

The SoboPro floor is compatible with all ProSafe products, such as lashing belts, CargoStopp and load securing nets. The protection floor is resistant to dirt and water, easy to clean and extremely scratch- and impact-resistant.

Installation and load securing floors

SoboPro LSC

Besides the lashing points for SR5 van racking, the SoboPro LSC offers additional floor lashing points. In combination with fixing rails fixed to the roof stringers above, your restraint poles can be inserted to allow form-fitted securing of the load. Bulky goods and panel materials can be conveniently fixed in this way and be secured for transport. The lashing points can, in addition, be used for ProSafe lashing belts. The 7-fold bonded mounting floor, having a thickness of 9 mm, is scratch-resistant as a result of its multi-directional textured coating and is extremely slip-resistant even when wet.

Wall claddings – Vehicle-specific interior protection

The SowaFlex wall cladding, made from lightweight honeycomb material, protects the loading space of the vehicle and weighs 60% less than comparable wood cladding. The extremely impact- and scratch-resistant material protects the vehicle chassis in an optimum manner from damage and can be installed in the vehicle simply and without difficulty by fastening to the points provided by the vehicle manufacturer.

SowaFlex

- protects the vehicle from the inside against damage
- extremely impact- and scratch-resistant
- tailor-made for the vehicle
- moisture and chemically resistant
- 60% lighter than wood
- 100% recyclable honeycomb material

Load securing – by no means a trivial matter, but rather a deciding factor for goods transport when it comes to personal and road safety. This topic primarily concerns vehicle drivers, but vehicle owners and the vehicle loaders also have a responsibility in this area as well. With ProSafe, we provide a load-securing system that offers the highest level of safety, along with numerous solutions for meeting legal requirements. From floor panels to van racking all the way to roof racks, ProSafe can be integrated universally into all Sortimo products. In addition, the system is also completely compatible with the original lashing points of the vehicle manufacturer. Therefore, load securing can be managed simply and conveniently, which saves both time and money.

ProSafe as standard – Load securing

Lashing rails

Sortimo lashing rails can be secured to the side panel, divider or to the van racking in conjunction with the SR5 side profile accessories adapter. Loads can be secured flexibly in the entire vehicle in conjunction with the SoboPro load securing floors and Sortimo lashing belts.

SR5 lashing rail incl. adapter

The ProSafe lashing rail incl. accessories adapter for the side profile of the SR5 van racking system is the perfect interface to the ProSafe lashing system in the vehicle interior. The adapter can be positioned at any height on the side profile quickly and easily, and then secured via screws.

Designation	Dimensions (WxDxH) / weight	Product description	Article no.	Price
Lashing rail ProSafe 03-3 SR5	Dimensions: 241 x 47 x 28 mm Weight: 0.2 kg	Width is approx. 253 mm.	1000012755	18.80 EUR
Lashing rail ProSafe 04 SR5	Dimensions: 345 x 47 x 28 mm Weight: 0.34 kg	Width is approx. 357 mm.	1000012209	23.30 EUR
Lashing rail ProSafe 05-3 SR5	Dimensions: 449 x 47 x 28 mm Weight: 0.4 kg	Width is approx. 461 mm.	1000012756	27.20 EUR

Side wall/divider lashing rail

The lashing rail can be secured to the side panel or to the divider n in the interior of the vehicle. This provides the perfect interface to the rest of the ProSafe lashing system. Mounting material is included in the scope of delivery.

Designation	Dimensions (WxDxH) / weight	Product description	Article no.	Price
ProSafe lashing rail 40-3	Dimensions: 968 x 47 x 25.5 mm Weight: 0.8 kg	Width is approx. 968 mm.	1000013990	42.10 EUR
ProSafe lashing rail 50-3	Dimensions: 1,210 x 47 x 25.5 mm Weight: 1.0 kg	Width is approx. 1,210 mm.	1000013991	50.70 EUR
ProSafe lashing rail 60-3	Dimensions: 1,452 x 47 x 25.5 mm Weight: 1.2 kg	Width is approx. 1,452 mm.	1000013992	58.70 EUR

ProSafe lashing rail 120-3	Dimensions: 2,904 x 47 x 25.5 mm Weight: 1.4 kg	Width is approx. 2,904 mm.	1000013993	90.60 EUR

ProSafe as standard – Load securing

Restraint poles

The universally compatible restraint poles can be used both horizontally and vertically for securing loads depending on the position of the attachment points. They offer an optimum hold, thanks to their square cross-section. With the aid of traverse frames, restraint poles can be used horizontally between two SR5 shelves.

Suitable load securing floor with integrated floor lashing points for securing restraint poles on Page 68

ProSafe aluminium restraint poles

The ProSafe aluminium restraint pole is available in different lengths and can be cut to size thanks to its practical aluminium profile. In conjunction with the SoboPro load securing floor restraint pole, in which the suitable floor lashing points for restraint poles are already integrated, this creates optimal cargo securing during transport.

Designation	Dimensions (WxDxH) / weight	Product description	Article no.	Price
ProSafe aluminium restraint pole 1715 mm	Dimensions: 1,750 x 50 x 45 mm Weight: 3.19 kg	Ready cut to length and pre-assembled restraint pole. Suitable for Renault Master/Vauxhall Movano/Nissan NV400 2010 (medium high roof/H2/rear-wheel drive)	1000012680	98.90 EUR
ProSafe aluminium restraint pole 1860 mm	Dimensions: 1,974 x 50 x 45 mm Weight: 3.46 kg	Ready cut to length and pre-assembled restraint pole. Suitable for MB Sprinter/VW Crafter 2006 (high roof/H2/rear-wheel drive/all-wheel drive), MB Sprinter 2018 (high roof/H2/rear-wheel drive/all-wheel drive), Fiat Ducato/ Citroën Jumper/ Peugeot Boxer 2006 (high roof/H2), VW Crafter/MAN TGE 16 (high roof/front-wheel drive) Hyundai H350 (high roof/H2)	1000012681	108.90 EUR
ProSafe aluminium restraint pole 2000 mm	Dimensions: 2,130 x 50 x 45 mm Weight: 3.56 kg	Aluminium profile for custom length adjustment and installation.	1000012682	98.90 EUR
ProSafe aluminium restraint pole 3000 mm	Dimensions: 3,114 x 50 x 45 mm Weight: 5.22 kg	Aluminium profile for custom length adjustment and installation.	1000012685	108.90 EUR

ProSafe restraint pole fixing rail

Fixing rail for attaching restraint poles in the roof area in combination with the ProSafe floor lashing point. The rail is available in two lengths and the fastening set is also included in the scope of delivery.

Designation	Dimensions (WxDxH) / weight	Product description	Article no.	Price
Restraint pole fixing rail PS 980 SR5	Dimensions: 1459 x 39 x 13.8 mm Weight: 0.42 kg	Rail length is 980 mm.	1000014082	25.80 EUR
Restraint pole fixing rail PS 1460 SR5	Dimensions: 960 x 39 x 13.8 mm Weight: 0.3 kg	Rail length is 1460 mm.	1000014083	37.90 EUR

ProSafe individual lashing point restraint pole

Product description		Article no.	Price
	ProSafe individual lashing point restraint pole	1000001736	15.80 EUR
	Dimensions (WxDxH): 83 x 20 x 5 mm Weight: 0.07 kg The ProSafe single lashing point is screwed into the longitudinal groove of the restraint pole and, depending on the type of load, can be moved and mounted individually. There are additional lashing options in the loading space to secure the load quickly, flexibly and professionally. Max. load: 200 daN		

ProSafe restraint pole holder

You can stow your restraint poles in a space-saving way in the loading space using the restraint pole holder when you no longer require them for securing loads. The holders can be fastened individually in the vehicle or to the ProSafe lashing rail using a screw fitting (part no. 6000003618). Mounting material is included in the scope of delivery.

Designation	Dimensions (WxDxH) / weight	Product description	Article no.	Price
ProSafe restraint pole holder PU 2	Dimensions: 120 x 113.5 x 48 mm Weight: 0.5 kg	Restraint pole holder set for two restraint poles.	1000015353	29.90 EUR

Anti-rattle mats

When securing cargo for transport, it makes sense to use slip resistant materials. Due to its properties, the anti-rattle mat provides an additional option for load securing in the vehicle and also protects the vehicle floor.

Designation	Dimensions (WxDxH) / weight	Product description	Article no.	Price
Universal anti-rattle mat 800 x 1200 x 4.5	Dimensions: 1,200 x 800 x 4.5 mm Weight: 2.02 kg	Suitable for securing pallets or other cargo Easy to clean due to closed surface Resistant to petrol and diesel 24 Friction coefficient in pulling direction $\mu \leq 0.8$	6000003365	49.70 EUR
Pallets anti-rattle mat 200 x 100 x 2,4 PU 4	Dimensions: 200 x 100 x 8 mm Weight: 0.12 kg	As underlay at the corners, e.g. for Euro wooden pallets Packaging unit: 4 pieces Resistant to petrol and diesel 24 Friction coefficient in pulling direction $\mu \leq 0.6$	801014002	8.70 EUR

ProSafe as standard – Load securing

Load securing belts

The ProSafe lashing system enables the flexible lashing of cargo due to the numerous potential connection points on the Sortimo vehicle floor, the van racking as well as the lashing rail for side panels and the ProPartition. Using the ProSafe lashing belt, you can secure cargo of all kinds in the vehicle quickly and easily.

ProSafe lashing belt with clamping lock

Load: max. 225 daN Belt width: 25 mm Turnbuckle: clamping lock End fitting: ProSafe hook

Workbenches

Turn your vehicle into a mobile workshop – with a workbench from Sortimo. The Sortimo workbenches can quickly and easily be adapted to the SR5 van racking or can be bolted to the floor of the vehicle. A sensible add-on to the workbench is a swivel vice plate with parallel vice which allows simple assembly work to be carried out directly at the vehicle. The mobile workshop simplifies day-to-day working and saves time while making a professional impression on the customer.

Product description	Article no.	Price
 Hinged workbench SR5 Dimensions (WxDxH): 810 x 260 x 210 mm Weight: 9.0 kg The working height of the workbench varies according to the loading edge of the vehicle. Distance from loading level to worktop at least 515 mm. Worktop dimensions 195 x 583 x 30 mm Fold-out workbench. (Installation on the SR5 van racking)	1000012542	357.36 EUR

Product description	Article no.	Price
 Heavy-duty workbench, hinged (short foot) Dimensions (WxDxH): 1,180 x 325 x 320 mm Weight: 22.1 kg The working height of the workbench varies between 760 mm and 940 mm depending on the loading edge of the vehicle. Distance from ground to the loading edge 643 - 823 mm. (Console height 117 mm) Worktop dimensions 280 x 1,000 x 35 mm. Suitable for vehicles with a high loading edge. (Mounted to vehicle floor)	1000000527	612.60 EUR
 Heavy-duty workbench, hinged Dimensions (WxDxH): 1,200 x 340 x 320 mm Weight: 25.0 kg The working height of the workbench varies between 760 mm and 940 mm depending on the loading edge of the vehicle. Distance from ground to the loading edge 490 - 670 mm. (Console height 270 mm) Worktop dimensions 280 x 1,000 x 35 mm. Suitable for vehicles with a low loading edge. (Mounted to vehicle floor)	1000000528	612.60 EUR

Parallel vice

The parallel vice is available in various different sizes and is a practical aid for a wide variety of work. All parallel vices have an integrated anvil, trapezoidal thread, forged-on pipe jaws and thus guarantee the highest precision.

Product description	Article no.	Price
Parallel vice 100 Jaw width is 100 mm, opening width is 125 mm.	6000002446	128.90 EUR
Parallel vice 120 Jaw width is 120 mm, opening width is 150 mm.	801008322	155.90 EUR

Swivel vice plate

The swivel vice plate serves as a link between the workbench and the parallel vice and is thus the optimum complement for your mobile workshop. The swivel vice plate can be moved through 360° in a circle and thus permits more flexible working with the parallel vice in the vehicle.

Product description	Article no.	Price
Swivel vice plate 100 Suitable for parallel vice 100.	6000002447	42.90 EUR
Swivel vice plate 120 Suitable for parallel vice 120.	801008324	53.70 EUR

Vehicle accessories – The mobile workshop

Auto-Assistant

The Auto-Assistant serves as a practical writing surface and organisation aid for documents on the passenger seat. Thanks to the adjustable clamping fixture for notes, two storage pockets for folders and brochures and a recess for a 1.5 l drink bottle, you always have the essentials for your appointments ready to hand. Additional storage space for documents can be found under the writing surface. This large compartment can also be subdivided with an optional partition wall so that two compartments are available to you.

Product description		Article no.	Price
	 <p>Auto-Assistant Dimensions (WxDxH): 362 x 661 x 480 mm Weight: 7.4 kg</p> <p>Scope of supply including fastening bracket for the backrest under the head restraint and belt guide on the side. Not suitable for installation on seats with non-removable head restraints.</p>	801013911	120.80 EUR
	 <p>E-headrest retaining plate for Auto-Assistant Dimensions (WxDxH): 266 x 68 x 2 mm Weight: 0.15 kg</p> <p>Facilitates fastening the Auto-Assistant, even with non-removable or electric head restraints.</p>	1000004023	11.70 EUR
	 <p>S-BOXX divider wide for SF Auto-Assistant Dimensions (WxDxH): 279 x 174 x 7 mm Weight: 0.08 kg</p> <p>For clear organisation of the space in your Auto-Assistant.</p>	1000002082	4.80 EUR

Panel table

The Sortimo panel table offers optimal, mobile office space in the cargo area, allowing you to handle administrative tasks or complete evaluations or documentation on site in the vehicle. The side panel table provides a large work surface of 628 x 600 mm and when folded away only takes up 180 x 700 mm of space so that it does not continually block valuable cargo space.

- Flexible screw connection to the side panel or ProPartition in the vehicle and to the Sortimo installation floor.
- The tabletop can handle loads up to a max. of 50 kg.
- Crash-tested as per ECE-R17.
- Head impact as per ECE-R21.
- Black cladding with a grained surface.
- Sturdy mechanical components and aluminium tabletop.
- Not for use while driving.

Product description		Article no.	Price
	 <p>Panel table Dimensions (WxDxH): 890 x 730 x 160 mm Weight: 18.0 kg</p> <p>Make more productive and better use of your time waiting between appointments with the practical side panel table.</p>	1000012716	795.00 EUR

Vehicle accessories – The mobile workshop

Interior ladder lift 1800

The Sortimo interior ladder lift provides a new solution for the simple and space-saving stowage of ladders inside the vehicle. The key benefit of this new development is that the ladder is installed underneath the ceiling, leaving the unused space available for additional storage. The optimisation of storage utilisation along with quick and easy handling saves both time and money.

- The ideal organisational aid for additional storage optimisation in the vehicle interior.
- Lets you easily transport aluminium double ladders up to 1.8 m long and 18 kg in weight on the roof lining.
- Easy and quick operation without major effort via a gas pressure spring.
- Highest level of safety during full braking and when cornering thanks to the high quality materials.
- Both retaining brackets are equipped with rubber mats to prevent damage.
- Not suitable for installation in vehicles with plastic strips.

Product description		Article no.	Price
	 <p>Interior ladder lift 1800 Dimensions (WxDxH): 1,790 x 184 x 250 mm Weight: 8.0 kg</p> <p>Suitable for all commercial vehicle models.</p>	1000004569	269.40 EUR

Aluminium foldable ladder for Sortimo TopSystem

The aluminium foldable ladder is the ideal combination for the interior ladder lift 1800, which is also suitable for high vehicles as a leaning ladder for loading and unloading from the Sortimo TopSystem. The slip-resistant rubber feet always ensure safe climbing and descending.

Product description		Article no.	Price
	 <p>TopSystem aluminium foldable ladder 3000 mm Dimensions (WxDxH): 1,570 x 350 x 125 mm Weight: 6.5 kg Stable folding lock, can fold away to 1.5 m Max. load: 150 kg</p>	811016006	147.80 EUR

Sortimo TopSystem
from page 255

Telescopic ladders

The telescopic ladders from Sortimo are made of anodised tubes and glass fibre reinforced hard plastic elements. Rubber feet provide for maximum grip on the ground.

Due to the compact dimensions, the ladders are easy to transport, perfectly suited for confined spaces and even fit into the boot of a car.

All the telescopic ladders comply with the requirements of DIN EN 131-6:2015, DIN EN 131-1:2016 and DIN EN 131-3:2007.

Product description		Article no.	Price
	<p>Telescopic combination ladder 2.30 m Dimensions (WxDxH): 610 x 165 x 710 mm Weight: 15.8 kg Telescopic combination ladder with 8 rungs. Extended length: 2.3 m Retracted length: 0.79 m</p> <p>Width: 0.48 m Load-bearing capacity: 150 kg</p>	801012159	449.20 EUR

Vehicle accessories – The mobile workshop

Ramp rails

Whether it be a washing machine or a lawn mower, the ramp rails, available in two lengths, rigid or folding, make possible the stowing of heavy and bulky loads quickly and conveniently. The lateral border protection (30/42 mm) enables reliable holding of the track when loading and unloading, even with large and heavy items. The transport area has a width of 150 mm (external width 234 mm), an anti-rattle mat coating P13 and a carrying capacity of 380 daN. This means that the aluminium rails not only save your back, but also make possible a rapid and convenient sequence for loading and unloading activities.

	Product description	Article no.	Price
	Foldable loading rails 2 m Dimensions (WxDxH): 2,000 x 234 x 47 mm Weight: 18.0 kg Two foldable aluminium loading rails 200 cm long.	801009244	589.90 EUR
	Foldable loading rails 2.5 m Dimensions (WxDxH): 2,500 x 234 x 47 mm Weight: 22.0 kg Two foldable aluminium loading rails 250 cm long.	801009246	665.60 EUR

Fans

The authorities require vehicle ventilation with free openings when transporting gas bottles. Sortimo offers a ventilation system that can be used either for ventilation or extraction, depending on whether you are using heavy or light gases. The aerodynamic shape means that the throughput of fresh air is far in excess of the legal requirement.

	Product description	Article no.	Price
	Roof vent Dimensions (WxDxH): 258 x 196 x 48 mm Weight: 0.93 kg Material: UV-resistant, impact-resistant plastic Functionality: Ventilation or extraction system (rotating) Suitable for gas transport as per DGUV. (In combination with floor or side vents)	80721099	91.20 EUR
	Small roof vent Dimensions (WxDxH): 97 x 72 x 135 mm Weight: 0.12 kg Material: UV-resistant, impact-resistant plastic Functionality: permanent fresh air circulation Suitable for gas transport in accordance with Dekra certification. (In combination with floor or side vents)	801016208	32.40 EUR
	Round floor vent Dimensions (WxDxH): 210 x 140 x 70 mm Weight: 0.26 kg Material: impact-resistant hard plastic with integrated thread Functionality: permanent fresh air circulation Suitable for gas transport in accordance with Dekra certification. (In combination with roof or side vents)	6000001283	35.40 EUR
	Side vent Dimensions (WxDxH): 183 x 73 x 128 mm Weight: 0.16 kg Material: UV / weather-resistant, impact-resistant plastic Functionality: permanent fresh air circulation, ventilation cross-section: 55 cm² Suitable for gas transport in accordance with DGUV (in combination with roof or floor vent)	1000014497	42.90 EUR
	Ventilation plate side panel Dimensions (WxDxH): 233 x 113 x 11 mm Weight: 0.20 kg The ventilation plate, made from stainless steel, is rust-resistant and is mounted on the side panel/ProPartition.	80721037	12.60 EUR

Vehicle accessories – The mobile workshop

Shovel holder tailgate

The shovel holder for the tailgate is perfectly suited for exploitation of this otherwise unused space on the tailgate. Bulky loads, such as boards and ladders, or shovels, brooms and other tools with long handles, are transported safely. Without having to access the vehicle, the shovel holder permits quick access to the equipment on site. In addition, the fixing rail is an aid for organised transport as a result of the hooks holding the equipment in place at all times, and thus improving organisation.

Product description	Article no.	Price
 <p>Fixing rail for shovel holder tailgate Dimensions (WxDxH): 530 x 115 x 32 mm Weight: 0.9 kg Optimal complement for the shovel holder – fixes the long-handled equipment at the top ensuring tidiness.</p>	1000002517	56.70 EUR

Holding fixtures

The U-shaped holding fixtures are suitable for the secure transport of round or semi-round objects, such as standpipes, hydrant wrenches and equipment with long handles. The freight can be quickly secured and released by means of the locking device bracket. This product is particularly durable due to its sturdy holder and in addition protects the secured object from damage by means of its shock absorbing rubber rings.

Product description	Article no.	Price
<p>Holding fixture 1 Dimensions (WxDxH): 156 x 126 x 44 mm Can accommodate objects with dimensions of up to 89 x 89 mm.</p>	801011062	40.90 EUR

Vehicle accessories – The mobile workshop

Hooks

The various different Sortimo hooks stow various different materials, such as chains, hoses, cables and even clothing in a safe and organised manner in the vehicle. The available storage space is used in an optimum manner, time for unnecessary material searching and sorting is saved and a professional appearance if shown to the customer.

Heavy-duty hanger

The heavy-duty hanger allows you to stow away your chains, hoses and cables in the vehicle in a quick and organised manner. It also permits immediate access to materials on site, eliminating tiresome searching and organising of cables and chains, permitting effective working.

Product description	Article no.	Price
Heavy-duty hanger 200 Dimensions (WxDxH): 300 x 203 x 97 mm Hook depth 20 cm, max. load 30 kg. Universal fastening in the vehicle interior.	1000003373	28.10 EUR

Aluminium wall hook

The wall hook can be installed anywhere in the vehicle and provides additional storage possibilities for lines, cables, hoses and much more. This means that important materials are always stowed in the vehicle in an organised manner and are always quickly accessible.

Product description	Article no.	Price
Aluminium wall hook 1 Dimensions (WxDxH): 116 x 10 x 82 mm Hook depth 80 mm, max. load 15 kg.	801012163	3.10 EUR
Aluminium wall hook 2 Dimensions (WxDxH): 120 x 140 x 12 mm Hook depth 115 mm, max. load 15 kg.	801012164	4.70 EUR
Aluminium wall hook 3 Dimensions (WxDxH): 216 x 188 x 11 mm Hook depth 170 mm, max. load 15 kg.	801012165	7.10 EUR

Product description		Article no.	Price
		Coat hook PU 3 Dimensions (WxDxH): 11 x 7 x 1 mm Weight: 0.03 kg The coat hooks can be mounted universally in the vehicle. This means that items of work clothing can be stowed in an organised manner in the vehicle and are quickly at hand if they are required. The packaging unit includes 3 coat hooks.	80713087 6.50 EUR

Vehicle accessories – The mobile workshop

Fuel canisters

Sortimo has two different fuel canisters in their product portfolio for the safe transport of fuel. Together with the associated holders, the canisters can be fastened simply in the load compartment of the vehicle and are available quickly if required.

Product description		Article no.	Price
	Fuel canister 10 litres Dimensions (WxDxH): 330 x 160 x 330 mm Weight: 1.0 kg The plastic canister has a filling volume of 10 litres and a plastic spout is included in the scope of supply. The carrying and filling of fuels for vehicles and engines is possible without any problems using this product.	801008042	27.30 EUR
	Fuel canister 20 litres Dimensions (WxDxH): 160 x 340 x 470 mm Weight: 4.2 kg The sheet metal fuel canister has a filling volume of 20 litres, a venting tube and a jerrycan closure. The canister is TÜV/GS tested and is perfectly suited for the transport of fuel for vehicles and engines.	801009986	36.50 EUR

Cleaning

Sortimo cleaning products offer everything to provide “clean working” and permit, at all times, a professional and organised appearance with respect to the customer, especially after difficult deployments.

Product description		Article no.	Price
	Water canister set 5 litres Dimensions (WxDxH): 330 x 180 x 290 mm Weight: 1.73 kg Water canister set (3-part) with 5 L wide-mouth canister.	80779205	74.10 EUR
	Water canister set 10 litres Dimensions (WxDxH): 280 x 125 x 300 mm Weight: 0.6 kg Wide-mouth canister capacity 5 litres.	80779199	83.70 EUR
	Wide-mouth canister 5 litres Dimensions (WxDxH): 280 x 125 x 300 mm Weight: 0.6 kg Wide-mouth canister capacity 5 litres.	801009995	24.90 EUR
	Wide-mouth canister 10 litres	801009993	34.60 EUR

Product description		Article no.	Price
	Hand cleaning cream in pump dispenser Dimensions (WxDxH): 230 x 280 x 175 mm Weight: 0.82 kg Pump dispenser including wall mount and 3 litres of hand cleaning cream. Cleans even without water. Bio-degradable, long-term skin protection with re-moisturisation, thoroughly removes, for instance, oil, grease, tar and printing ink.	80711007	56.80 EUR
	Hand cleaning cream 3 litres Dimensions (WxDxH): 230 x 300 x 180 mm Weight: 2.85 kg The hand cleaning cream refill set with a 3 litre capacity is suitable for the pump dispenser (Art. No.: 80711007). The hand cleaning cream cleans even without water and affords to a sustainable skin protection.	801010017	18.60 EUR
	PVC hose 1 metre Dimensions (WxDxH): 30 x 170 x 165 mm Weight: 0.12 kg Suitable for the outlet valve (801009992) for precise and easy draining of the wide-mouth canister.	80779212	6.40 EUR
	Tap for water canister Dimensions (WxDxH): 105 x 51 x 51 mm Weight: 0.04 kg Outlet tap appropriate for the Sortimo wide-mouth canister 5 or 10 litres.	801009992	12.60 EUR

SowaApp – always ready to hand

SowaApp

The Sortimo wall cladding protects your vehicle, not only from scratches and damage, but it also offers simple storage options for tools and frequently required consumables. The moisture-resistant and sturdy wall is tailor-made to suit the vehicle and serves as a system cladding e.g. above workbenches. The innovative Sortimo system perforation allows attachment of a wide range of accessories, such as hooks, hose holders, storage pockets, perforated wall hooks and much more.

SowaApp – Holder

You can transform your vehicle into a mobile workplace with the innovative accessories for the aluminium side panel. The holders have been developed specially for the system perforated plate and make the working day more efficient. The mounting process is very simple thanks to metal straps for hooking-in and additionally supplied plastic rivets for fixation purposes. Each aluminium side panel accessory can also be loaded with up to 2 kg, so that installation and electrical tools can be stowed without any problem and they remain accessible at all times.

		Multi roll holder side panel	1000004633	16.10 EUR
Dimensions (WxDxH): 140 x 135 x 16 mm				
Weight: 0.15 kg				
Suitable for round objects, such as the universal anti-rattle mat 800x1200 mm (Art. No. 6000003365). Securing is by Velcro strip. A 380 mm long Velcro strip is included with the roll multi-holder.				
Velcro fastener for bundling L=380, W=30		6000003364	3.90 EUR	
		Round holder for tools 80	6000002429	5.10 EUR
Aluminium side panel				
Dimensions (WxDxH): 107 x 35 x 60 mm				
Weight: 0.05 kg				
Holder diameter is approx. 80 mm.				
		Tool tray for pliers 61	6000002430	5.10 EUR
Aluminium side panel				
Dimensions (WxDxH): 60 x 35 x 58 mm				
Weight: 0.03 kg				
Holder width is approx. 61 mm.				

	Plaster dispenser side panel	1000004632	43.00 EUR
Dimensions (WxDxH): 223 x 166 x 67 mm			
Weight: 0.52 kg			
The plaster dispenser, including holder for the aluminium side panel, is intended for treating small injuries and guarantees hygienic removal of finger dressings and textile plasters. You also have the additional benefit that the plaster can be immediately used since the protection paper on the back is removed automatically. Finger dressings and textile plasters are included in the scope of supply.			
Refill pack textile plasters 72 x 19 mm		6000003303	16.50 EUR
Refill pack finger dressings 120 x 20 mm		6000003304	16.50 EUR

SowaApp – always ready to hand

Clamps and hooks

The clamps and hooks, made from sturdy glass-fibre reinforced plastic, are designed precisely to suit the slotted holes in the Sortimo wall cladding and can be installed and removed using just one hand and without the need for tools. The hooks and clamps locate securely in height in the wall cladding via two holes, and thus distribute the load evenly on the ground. The tool hooks, tool holders and tool clamps, and the Sortimo wall cladding have been developed specially for the dynamic loads in the vehicle.

Lamps

To ensure that everything is properly lit, Sortimo also offers portable lamps in various versions alongside the work lamps. For frequent working directly at the vehicle we recommend mounting a stationary work lamp directly on the vehicle, so that it provides optimum illumination of the surroundings and so that work on the vehicle can take place independently of the light conditions. For flexible deployment, Sortimo offers the LED magnet portable lamp that can be mounted anywhere on the vehicle and which is powered from the cigarette lighter via a spiral cable.

Product description		Article no.	Price
	Work lamp LED 12/24 V 2000 lm Dimensions (WxDxH): 100 x 100 x 76 mm Weight: 0.91 kg LED module with 6 diodes for fixed installation on the vehicle with omega holder – can be rotated and swivelled. Voltage range: 12 - 24 VDC Light flux: 2000 lm Colour temperature: 5700-7000 K Nominal strength: 25 W On/off switch: no switch Cable length: 0.5 m Protection rating: IP 68 Installation: Fixed installation	6000003241	122.50 EUR

Sortimo – experts in vehicle electronics

Benefit from

- our decades of experience with vehicle electronics
- our qualified and regularly trained technical personnel
- our product range which is carefully selected to meet the highest expectations
- compliance with all legally required tests and guidelines

The installation and removal of electronic components may only be performed by qualified technical personnel.

Electrical accessories – everything in the right light

Switches

Sortimo has various different versions of switches in their product portfolio - to suit the application in question. With the variants with integrated check lamp you can see at a glance whether the power supply is switched on or off, which is particularly useful when working with warning lamps. With the two-way and push-button switches, pressing the button causes the power supply to be switched on or off, depending on the previous position of the switch. Therefore a switch can be positioned both on the tailgate as well as on the sliding doors and the light can always be controlled from any position.

Two-way switch round on/on
Article no. 6000000710

Product description	Article no.	Price
 12 V on/off switch with orange indicator light Suitable for body switch for beacons. Voltage range: 12 VDC Max. switching power: 8 A Connection: three flat plug connections with 6.3 mm	801014906	10.80 EUR

Sockets

Even the selection of the correct socket rail or the matching power distributor involves consideration of many different aspects, and large differences must be taken into account. We therefore recommend being clear, in advance, about the application in order then to be able to make the correct decision about the design and various different functionalities. Sortimo offers a wide range of various different options, depending on the requirement.

Electrical accessories – everything in the right light

Inverter

The inverter generates 230 V AC from the 12 V on-board power, thus also permitting the operation of electrical equipment in the vehicle on the road. All Sortimo inverters are input side protected against reverse voltage, over voltage and under voltage, and on the output side are protected from short-circuiting, overload and over-temperature. Installation and use inside or outside the vehicle is only allowed after testing and compliance with the required intended purpose.

Safety and first aid – for all eventualities

First aid

The Sortimo First Aid BOXes are useful aids in an emergency. The integrated small component inserts means that the dressings are clearly laid out, they are easy to see and are quickly to hand if required. This helps you to stay calm and retain your composure even in difficult situations.

Safety and first aid – for all eventualities

Beacons

The Sortimo beacons raise awareness in the danger area and thus increase safety in deployment both during the day and at night. The yellow flashing light is used specially to warn about hazards (see § 38 StVO). Sortimo offers various different options for construction - fixed in the vehicle, installation on a plug base or telescopic masts and, for flexible use, fixing by magnetic holder.

Product description		Article no.	Price
	LED beacon, yellow 10-30 V fixed installation	6000002369	162.70 EUR
	Dimensions (WxDxH): 155 x 155 x 185 mm Weight: 0.8 kg Operating voltage: 10-30 VDC Protection rating: IP 67 Height: 141 mm Number of double flashes: 120 per minute Complies with the stipulations of ECE R65 E04 006598 and ECE R10-04.	Fixing: fixed installation on the vehicle roof (B1 type in accordance with DIN 14620) Operating temperature: -40 to +70 °C Diameter: 154 mm	

	LED beacon yellow, 10-30 V plug socket	6000002370	167.90 EUR

SR-BOXXes

SR-BOXXes are ideal for stowing small components and tools. The BOXXes can be integrated on, and under, the shelves in the van racking using the plastic slides. Optional subdivision options provide even greater organisation. Label clips can be used on the front of the SR-BOXXes to apply *mySortimo* labels to the BOXXes. The contents of the BOXXes can be categorised using differently coloured labelling.

SR-BOXXes without lid	Technical details	Description	Article no.	Price
SR-BOXX 03-8 M	Dimensions: 243 x 140 x 128 mm Weight: 0.29 kg	The interior space can be divided across the depth using a 00-8 M divider.	6000011426	7.20 EUR

SR-BOXX – The organisational system for SR5.

Lid for SR-BOXX

The transparent lid closes the SR-BOXX dust-tight, and protects the contents from dirt. The transparent design provides for a constant overview of the contents. On the one hand, this minimises the time you spend searching for materials and consumables, at the same time allowing stock levels of small components to be determined at a glance. You can see earlier when you need to re-order, thereby avoiding costly downtimes.

Thanks to the **insetboxes of height 31 mm**, the respective intermediate floors for cases, L-BOXXes and T-BOXXes can be filled, thereby allowing safe storage and transportation of small components on two levels.

The **insetboxes with a height of 63 mm** fit in all cases and BOXXes and can be subdivided further with dividers as of a grid size of 1x2. This height is ideal for sorting your small components and consumables and increasing organisation.

The **insetbox height of 95 mm** was developed specifically for the L-BOXX 136 G4, the metal case KM 330 and the drawer height 8 and higher. The insetboxes can be subdivided as desired with dividers. They can safely store large quantities of small components as well as larger consumables.

Preconfigured insetbox sets immediately at the respective case or BOXX.

The **insetbox height of 95 mm** was developed specifically for the L-BOXX 136 G4, the metal case KM 330 and the drawer height 8 and higher. The insetboxes can be subdivided as desired with dividers. They can safely store large quantities of small components as well as larger consumables.

Cases and BOXXes

The sturdy case for tough everyday use.

Metal cases

Simplified working through one-handed operation

Interior with customised subdivision

Integration in all Sortimo transport solutions possible

Foam insert in the lid prevents mixing of small parts

Metal case – The sturdy case for tough everyday use.

The metal case

The legendary metal case from Sortimo – a classic continuously developed further since 1973. Available in four different sizes, it offers the ultimate in work convenience for various fields of use.

Metal case KM (small components case)

The small components case (KM) has an insetbox set that makes it possible to store small parts tidily and allow quick access to them. The layout of the insetboxes can be rearranged as required, it is also possible to remove individual insetboxes. Sortimo also offers adhesive labels in various colours for individual labelling.

from Page 162

Metal case WM (tool case)

The tool case (WM) uses a divider insert to allow free positioning of dividers for individual subdivision of the interior. This means that equipment is always securely stowed away and power tools are transported safely. The dividers come in predefined sets, but also allow individual combination for your own configuration.

from Page 169

Metal case DK (nozzle case)

The nozzle case (DK) with foam insert is designed specifically for heating burner nozzles. It is the ideal solution for safe and protected transport of burner nozzles and lets you see immediately when the stock levels start to fall.

from Page 165

Metal case – The sturdy case for tough everyday use.

Metal case KM (small components case)

Empty small components cases can be equipped with insetboxes as daily needs require.

	Designation	Dimensions (WxDxH) / weight	Product description	Article no.	Price
1	Metal case KM 320	Dimensions: 440 x 330 x 66 mm Weight: 2.6 kg	Metal case for storing insetboxes height 63 mm. (Optional combination of insetbox heights 31 mm / 31 mm in conjunction with an intermediate floor)	5228000	47.60 EUR
2	Metal case KM 330	Dimensions: 440 x 330 x 100 mm Weight: 3.0 kg	Metal case for storing insetboxes height 95 mm. (Optional combination of insetbox heights 63 mm / 31 mm in conjunction with an intermediate floor)	5228390	55.00 EUR
3	Metal case KM 340	Dimensions: 440 x 330 x 130 mm Weight: 3.52 kg	Metal case for storing insetboxes. (Optional combination of insetbox heights 31 mm / 95 mm as well as 63 mm / 63 mm in conjunction with an intermediate floor)	5228550	60.20 EUR
4	Metal case KM 350	Dimensions: 440 x 330 x 170 mm Weight: 3.68 kg	Metal case for storing insetboxes. (Optional combination of insetbox heights 63 mm / 95 mm in conjunction with an intermediate floor)	5228710	66.70 EUR

All insetboxes from size 1 x 2 can be further subdivided.

Metal case KM 320

The following pre-configured sets with insetboxes are available to you for the daily challenges in storage and safe transport of small parts.

		Product description	Article no.	Price

T-BOXX G hook-in adapter

	Product description	Article no.	Price
	T-BOXX G hook-in adapter SET Dimensions (WxDxH): 215 x 155 x 30 mm Weight: 0.30 kg The T-BOXX G hook-in adapter for securing a T-BOXX G to the Sortimo perforated aluminium grid or to a flat surface.	6000011351	15.90 EUR

Tool tray inlays – High-quality tool sets from Gedore.

The tool tray insert can be integrated optimally in the T-BOXX G and metal case WM 320. The format of the insert corresponds to the Sortimo insetbox grid 3x6 and 6x6 respectively and can thus be combined optimally with insetboxes. The tools are transported safely and tidily in the foam insert. Furthermore, it is in two colours so that you can immediately see if tools are missing. The material of the insert is resistant to oils and greases, and is easy to clean with water.

L-BOXXes G/G4 – The stacking champions for all-rounders.

Insetboxes

Thanks to the insetbox grid on the bottom of the L-BOXX 102 G4 and L-BOXX 136 G4, insetboxes can be arranged individually and removed at any time when needed. Small components are transported safely and stock levels are visible at all times. The insetboxes can also be integrated in the L-BOXX 238 G and L-BOXX 374 G using an intermediate floor.

from Page 181

Mobility

Sortimo offers a range of transport options to optimise trips to work – naturally tailored to meet everyday needs. The BOXXes range with mobility solutions not only saves time, but also increases efficiency when it comes to the transport of tools and materials. Stowed safely in the vehicle for an easy trip to the place of use.

from Page 197

L-BOXX inserts

To meet the daily challenges in the transport and storage of materials, Sortimo offers a range of inserts with which the L-BOXX G/G4 can be adapted to individual requirements. Sortimo thus offers the ideal storage solution and optimises work procedures for various applications.

from Page 188

Dividers

The many different divider combinations offer the optimum in tidiness and organisation. That allows effective work while simultaneously protecting the contents. Larger tools and work utensils are transported safely and stored tidily. The dividers are available individually or in a preconfigured set.

from Page 183

Tool storage

Tool modules enable tidy and structured storage of tools. Sortimo offers solutions for the interior as well as for the side tool cards on the outer side walls. This guarantees quick access and makes work procedures even more efficient, resulting in an immense saving of time in your routine daily work.

	Tool card 2 L-BOXX G4, 3-sided Dimensions (WxDxH): 371 x 306 x 30 mm Weight: 0.91 kg The tool card can be equipped from 3 sides and is mounted in the lid. The rubber loops and pockets provide optimum storage options for tools such as screwdrivers, pliers, etc.	1000011322	51.80 EUR

L-BOXXes G/G4 – The stacking champions for all-rounders.

AluCaddy foldable

Product description		Article no.	Price
	AluCaddy foldable Dimensions (WxDxH): 490 x 490 x 1,090 mm Weight: 6.0 kg The foldable AluCaddy allows you to transport your BOXXes and bulky cargo effortlessly and more efficiently to your desired place of operation. The AluCaddy, with a bearing load of 150 kg, is a practical aid for the daily transport of your materials.	801014905	139.80 EUR
	Wall fixation AluCaddy Dimensions (WxDxH): 504 x 53 x 61 mm Weight: 1.2 kg The wall fixation can, for example, be mounted on the rear door and serves for safe mounting of the collapsed AluCaddy in the vehicle.	1000004391	22.80 EUR

ProSafe adapter plate

Product description		Article no.	Price
	ProSafe adapter plate 20-36 L-BOXX Dimensions (WxDxH): 612 x 462 x 30 mm Weight: 4.0 kg The ProSafe adapter plate ensures the secure transport of multiple, stacked L-BOXXes up to a total height of 36 grids (= 612 mm). L-BOXXes must also be secured using a lashing belt for each adapter plate used.	1000000623	53.30 EUR
	ProSafe adapter plate 20-54 L-BOXX Dimensions (WxDxH): 918 x 462 x 30 mm Weight: 6.0 kg The ProSafe adapter plate ensures the secure transport of multiple, stacked L-BOXXes up to a total height of 54 grids (= 918 mm). L-BOXXes must also be secured using a lashing belt for each adapter plate used.	1000000624	65.40 EUR

L-BOXXes G/G4 – The stacking champions for all-rounders.

L-BOXX trolley

	Product description	Article no.	Price
 	L-BOXX trolley Dimensions (WxDxH): 650 x 510 x 150 mm Weight: 3.91 kg Transports the entire L-BOXX family comfortably as an interconnected unit. Low net weight, high loading capacity (up to 100 kg) and four wheels (two of which are lockable) ensures easy manoeuvring in narrow spaces and minimal work trips.	121015412	119.20 EUR
 	Fixation strap trolley L-BOXX Dimensions (WxDxH): 2,500 x 25 x 0 mm Weight: 0.5 kg Provides for additional securing of the L-BOXXes or freight on the L-BOXX trolley.	121015519	17.70 EUR
 	Retaining plate L-BOXX G trolley Dimensions (WxDxH): 506 x 200 x 38 mm Weight: 0.72 kg Stores the L-BOXX G trolley quickly and securely in the vehicle. Integrated rubber stoppers prevent annoying rattling noise when driving.	1000011086	33.40 EUR

L-BOXX seat retainer

	Product description	Article no.	Price
 	L-BOXX G seat retainer Dimensions (WxDxH): 470 x 369 x 45 mm Weight: 2.0 kg Enables the secure transport of L-BOXXes in the vehicle. The safety belt ensures a secure attachment of the retainer – the BOXXes are secured in the retainer via a lashing belt.	1000011087	77.70 EUR

L-BOXX seat cushion

	Product description	Article no.	Price
 	Seat cushion top cover L-BOXX Dimensions (WxDxH): 328 x 225 x 24 mm Weight: 0.09 kg The two-part seat cushion made of soft foam transforms every L-BOXX into a comfortable seat.	121015436	11.70 EUR

L-BOXX ProSafe bracket

	Product description	Article no.	Price
 	L-BOXX ProSafe bracket Dimensions (WxDxH): 115 x 52 x 20 mm Weight: 0.45 kg Secure individual L-BOXXes or in combination between the two ProSafe brackets. Furthermore, the BOXXes can be secured with the ProSafe lashing belt, which can be directly hooked into the L-BOXX ProSafe brackets. The lashing points have a resilience of up to 200 daN.	1000001773	16.00 EUR

Tool mats

The soft tool mat made of rubber not only protects the contents, but also the L-BOXX itself against damage and prevents annoying rattling noise during transit.

Designation	Dimensions (WxDxH) / weight	Product description	Article no.	Price
Tool mat L-BOXX 102/136 G4	Dimensions: 416 x 307 x 2 mm Weight: 0.10 kg	Suitable for the L-BOXX 102 G4 and L-BOXX 136 G4.	6000010972	4.60 EUR
Anti-rattle mat for the L-BOXX 238 G	Dimensions: 380 x 300 x 2 mm Weight: 0.08 kg	Suitable for the L-BOXX 238 G.	121015733	4.90 EUR
Anti-rattle mat for the L-BOXX 374 G	Dimensions: 380 x 290 x 4 mm Weight: 0.08 kg	Suitable for the L-BOXX 374 G.	121015734	4.90 EUR

L-BOXXes G/G4 – The stacking champions for all-rounders.

L-BOXX worktops

The worktops can be fastened to the BOXX lids quickly and easily to convert the L-BOXX to a mobile workplace for minor adaptations at the work site. The worktops come in four different variants.

Product description		Article no.	Price
 	Large L-BOXX worktop Dimensions (WxDxH): 1,400 x 700 x 18 mm Weight: 14.0 kg The large L-BOXX worktop is attached flexibly to the L-BOXX family via a latching mechanism. This results in a mobile workplace, based on top of two BOXXes towers, which is ideal for smaller adjustment work directly on site.	1000001303	134.30 EUR
 	Small L-BOXX worktop Dimensions (WxDxH): 500 x 700 x 18 mm Weight: 4.5 kg The small L-BOXX worktop is attached flexibly to the L-BOXX family via a latching mechanism. This results in a mobile workplace, based on top of several BOXXes stacked on top of one another, which is ideal for doing smaller adjustment work directly on site.	1000001369	83.80 EUR
 	Worktop for L-BOXX G, two-part Dimensions (WxDxH): 228 x 328 x 30 mm Weight: 1.97 kg Two-part worktop made from high-quality beech-Multiplex (14 mm thickness) for smaller tasks directly on site.	121017994	30.60 EUR
 	Worktop for L-BOXX G, one-part Dimensions (WxDxH): 440 x 350 x 18 mm Weight: 1.27 kg Worktop made from high-quality beech-Multiplex (18 mm thickness) for smaller tasks directly on site.	121017995	32.80 EUR
 	Screw clamp 160 Dimensions (WxDxH): 208 x 81 x 22 mm Weight: 0.32 kg Screw clamp with span of 160 mm to fasten workpieces.	6000002539	19.10 EUR

The customisable service depot in pallet format

sContainer

Mobile depot
with optional shelf system

Minimum footprint,
maximum use of space

Seamless integration into
transport and logistics chains

Low acquisition
and maintenance costs

sContainer – The advantages at a glance

Mobile depot with optional shelf system

The sContainer is used as a mobile depot on construction sites or during service calls – if desired, including an organisation system. This means that tools and consumables are available directly on site. This is a great advantage for longer-term construction sites or inner city operations where it is not always possible to drive commercial vehicles to the site.

Seamless integration into transport and logistics chains

Because its footprint is the same format as a euro pallet, the sContainer is cost-effective to integrate into any logistics process. It can be moved by forklift trucks and transported inexpensively by lorry, ship or plane. So you can use the sContainer globally and have it delivered directly to the place of use. Your service or construction site team simply follows behind.

Individually configurable.
Get in touch! Your personal point
of contact is listed from page 294.

Minimum footprint, maximum use of space

The footprint of the sContainer is no larger than one euro pallet. This makes the service container a compact depot with plenty of interior space for the tightest of construction sites or service operations. Because integrating an SR5 racking system creates storage space on several levels, which can be used for tools and consumables.

Low acquisition and maintenance costs

The sContainer is not only much cheaper to buy than a commercial vehicle, for example, but also cheaper to maintain. Because motor vehicle insurance and taxes do not apply. So use the mobile depot to avoid having to drive your tools, machinery and consumables back and forth every day – saving a lot of fuel costs in the process and ensuring that no equipment is left behind.

sContainer – Product features

Sturdy material

The base is a massive frame that can take loads of up to 500 kg. The shell is made of powder-coated sheet steel. A plastic cover prevents the ingress of rainwater.

Advertising space

The side walls of the sContainer are an excellent advertising space for your company. We would be pleased to provide you with a custom decal proposal. Get in touch! Your personal point of contact is listed from page 294.

Lifting eyes

As an option, the lifting eyes can be retrofitted so that the sContainer can also be moved around on site by crane.

Lock

Choose between three locks for the sContainer. The cheapest variant is the padlock, which ensures solid protection against theft. Alternatively, you can choose a cylinder lock or the high-end version, the electronic combination lock that does away with the need for keys.

Transport slots

The floor assembly of the sContainer is based on a euro pallet. This means the container can be picked up and transported by forklift trucks.

Interior

The interior is easily accessible through a large door. The floor is covered with resistant SoboGrip flooring. A unique feature is that components of the SR5 van racking can be installed in the interior and ensure optimum organisation and additional load securing.

sContainer – Versatility in pallet format

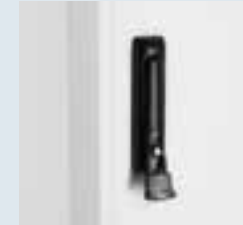

Choose the right lock for your needs from three options:

Designation	Product description	Article no.	Price
 sContainer 1900 PL	with device for locking with a U-lock	1000013961	1,295.00 EUR
 sContainer 1900 CL	with integrated cylinder lock	1000013962	1,345.00 EUR
 sContainer 1900 EL	with electronic combination lock	1000013963	1,545.00 EUR

Accessories for outside

	Product description	Article no.	Price
	sContainer lifting kit Dimensions (WxDxH): 55.5 x 36.5 x 73.5 mm Weight: 1 kg The lifting kit can be used to upgrade the container to allow it to be transported by crane. The eyes can still be rotated even under load and are therefore always optimally aligned in the direction of force.	1000013967	148.00 EUR
	Small roof vent Dimensions (WxDxH): 97 x 72 x 135 mm Weight: 0.12 kg Material: UV-resistant, impact-resistant plastic Functionality: permanent fresh air circulation Suitable for transporting gases in accordance with Dekra certification (in combination with floor or side vent)	801016208	32.40 EUR
	U-lock with a hard plastic coating Dimensions (WxDxH): 140 x 90 x 70 mm Weight: 1.13 kg Ideal complement to the sContainer PL. The plastic shell protects surrounding parts from damage. This function is ensured even under unfavourable weather conditions thanks to the cover cap.	6000002883	11.20 EUR

sContainer – Accessories

Accessories for the interior

	Product description	Article no.	Price
	 Round floor vent Dimensions (WxDxH): 210 x 140 x 70 mm Weight: 0.26 kg The floor vent, in combination with the roof vent (Art. No. 801016208) ensures permanent air exchange inside the sContainer. The combined installation of the two vents is certified by Dekra for gas transport.	6000001283	35.40 EUR
	 Shelf 711x498mm storage SCON SR5 Dimensions (WxDxH): 711 x 498 x 73 mm Weight: 5.18 kg The shelf offers a generous storage area. Combining two shelves creates a storage space over the entire depth of the sContainer.	1000014331	42.00 EUR
	 ProSafe single lashing point SCON SR5 Dimensions (WxDxH): 50 x 31 x 26 mm Weight: 0.14 kg The load stowed in the sContainer can be secured using the ProSafe single lashing point. Matching ProSafe lashing belts can be found on page 104.	1000014311	7.90 EUR
	 ProSafe lashing rail 1100mm SCON SR5 Dimensions (WxDxH): 1,000 x 28 x 47 mm Weight: 0.78 kg The ProSafe lashing rail provides numerous lashing points for securing the load in the sContainer. The rubber inlay provides a contact surface for the load and protects it from damage.	1000014312	50.70 EUR

Hooks and holders

	Product description	Article no.	Price
	 Storage pocket 04-7 SCON SR5 Dimensions (WxDxH): 142 x 352 x 123 mm Weight: 0.8 kg Provides additional storage space on the side panels of the sContainer. Screwdrivers, pliers and more can be conveniently and quickly stowed away on the integrated clamping strip.	1000014320	28.90 EUR
	 i-BOXX wall holder Dimensions (WxDxH): 322 x 354 x 46 mm Weight: 0.38 kg The i-BOXX wall holder allows i-BOXXes to be stowed on the side panel of the sContainer for quick access. The BOXX can easily be removed from the holder with one hand.	1000014321	19.70 EUR
			

Hose holder

The hose holders are used to stow hoses and cables. Three sizes are available depending on the application.

Designation	Dimensions (WxDxH) / weight	Article no.	Price
Hose holder small SCON SR5	Dimensions: 195 x 357 x 136 mm Weight: 0.3 kg	1000014314	27.90 EUR
Hose holder medium SCON SR5	Dimensions: 260 x 190 x 106 mm Weight: 0.81 kg	1000014315	44.50 EUR
Hose holder large SCON SR5	Dimensions: 350 x 250 x 145 mm Weight: 1.4 kg	1000014316	52.50 EUR

Hook strip

The hook strips are available in three different sizes and can be mounted on the side panels of the sContainer.

Designation	Dimensions (WxDxH) / weight	Article no.	Price
Hook strip 03 SCON SR5	Dimensions: 251 x 87.2 x 53 mm Weight: 0.54 kg	1000014317	25.00 EUR
Hook strip 04 SCON SR5	Dimensions: 355 x 98.1 x 53 mm Weight: 1.17 kg	1000014318	27.10 EUR
Hook strip 05 SCON SR5	Dimensions: 459 x 87.2 x 53 mm Weight: 1.01 kg	1000014319	29.30 EUR

COMPATIBILITY
with the Sortimo BOXX range

WorkMo – at a glance

WorkMo is a multi-functional transport, organisation and work system. The individual modules can be combined flexibly to suit the application. Comprehensive accessories are used to create application-oriented and transportable workplaces for the workshop and the building site. The WorkMo is also unique due to its compatibility with the Sortimo BOXXes range. Various organisational solutions offer storage space for small parts and tools of all kinds. Diverse BOXX partnerships with suppliers of power tools and electric tools and mounting and fastening materials mean that complete system compatibility is a given. Click, connect, everything fits together – you can't get more productive!

WorkMo – 24-500

Dimensions (WxHxD): 526 x 506 x 396 mm Load-bearing capacity of the lid: 100 kg Maximum payload: 100 kg

The modules of size 24-500 are the most compact in the WorkMo family. They are therefore suited to frequent transport and variable combinations as a result of their light weight. The wide range of options with drawers, BOXX-es, cases or a universal cabinet offer solutions for diverse applications. The modules can be coupled together to, for example, combine two modules with accessories, such as a tool shelf, worktops or worktables to produce a mobile workplace. Mobility solutions, such as dollies, roller skids or the AluCaddy make the WorkMo a mobile unit.

Product description		Article no.	Price
		WorkMo 24-500 with 2 BOXX floors Weight: 10.1 kg Example equipment: 1 x L-BOXX 102 G4 and 1 x L-BOXX 238 G	1000003814 157.40 EUR

Mobile working

WorkMo – 24-750

Dimensions (WxHxD): 526 x 744 x 396 mm Load-bearing capacity of the lid: 100 kg Maximum payload: 100 kg

WorkMos in size 24-750, at the same width, are about 250 mm higher than the modules in size 24-500. This obviously offers benefits in terms of storage. Many configurations with drawers, BOXXes, cases, universal cabinets and shelves provide for diverse applications. A working height of about 90 cm is available when using a module in combination with a roller or the roller skids. Complemented with accessories, such as a tool shelf, worktops or worktables, and various side panel accessories, this creates a fully-fledged mobile workplace for use in the workshop or on site.

Product description		Article no.	Price

WorkMo – 34-500

Dimensions (WxHxD): 789 x 506 x 396 mm Load-bearing capacity of the lid: 100 kg Maximum payload: 100 kg

The sizes 34-500 and 34-750 offer even more storage space for your tools and consumables. The most varied of applications are possible, equipped with drawers, shelves with drop-down fronts or BOXXes. There are also accessories such as dollies, roller skids, worktops and side panel accessories available for these modules.

WorkMo – 44-500

Dimensions (WxHxD): 1,052 x 506 x 396 mm Load-bearing capacity of the lid: 100 kg Maximum payload: 100 kg

The width 4 modules truly come into their own when used stationary providing maximum storage space and a large worktop! Options equipped with drawers, shelves with drop-down fronts or BOXXes allow a wide range of uses. With accessories such as worktops, dollies and roller skids, as well as various different extensions for the side panels, the WorkMo can be further enhanced.

Roller – Flexible and high-load

You can make your WorkMo mobile by using the roller made from beech-Multi-plex. The fully rubberised wheels (2 of which have brakes) are sturdy and ensure quiet movement, even on rough terrain. They are connected to the WorkMo by a coupling lever. The flat surface, in combination with integrated lashing points and the load-bearing capacity of up to 200 kg also allows its use as a transport roller.

Roller

Product	Technical details	Fits ...	Article no.	Price
Roller WorkMo 24	Dimensions: 612 x 493 x 144 mm Weight: 6.54 kg	WorkMo modules sizes 24-500 and 24-750.	1000003706	125.70 EUR
Roller WorkMo 34	Dimensions: 854 x 493 x 144 mm Weight: 8.94 kg	WorkMo modules sizes 34-500 and 34-750.	1000003707	157.40 EUR
Roller WorkMo 44	Dimensions: 1,096 x 493 x 144 mm Weight: 10.0 kg	WorkMo modules sizes 44-500 and 44-750	1000003708	178.50 EUR

Product description	Article no.	Price
 WorkMo roller wall holder Dimensions (WxDxH): 270 x 97 x 254 mm Weight: 1.5 kg Installation on the van racking system or bodywork. Secure storage of all WorkMo dollies in the vehicle.	1000003963	25.40 EUR

AluCaddy – compact and flexible

The WorkMo is permanently mobile with the roller skids. Once mounted the WorkMo can be permanently rolled. The roller skid is compatible with all WorkMo modules. Two of the wheels can be locked, ensuring stability under load while working.

Product description		Article no.	Price
	Roller skid WorkMo PU2 Dimensions (WxDxH): 546 x 145 x 108 mm Weight: 2.56 kg Continuous mobility for WorkMo. Suitable for all WorkMo modules. Load capacity up to 150 kg.	6000002992	73.00 EUR

Product description		Article no.	Price
	AluCaddy foldable Dimensions (WxDxH): 490 x 490 x 1,090 mm Weight: 6.0 kg The WorkMo modules can be transported conveniently using the folding AluCaddy. The AluCaddy, with a bearing load of 150 kg, is a practical aid for the daily transport of materials.	801014905	139.80 EUR

	Wall fixation AluCaddy Dimensions (WxDxH): 504 x 53 x 61 mm Weight: 1.2 kg The wall fixation can, for example, be mounted on the rear door and serves for safe mounting of the collapsed AluCaddy in the vehicle.	1000004391	22.80 EUR
---	---	------------	-----------

Worktables – Convenient working like in the workshop

WorkMo worktables provide modular and mobile workbenches – for safe and comfortable work any where you are. The tables are suitable for WorkMo combinations of 2 x 24-500 or 1 x 24-750 on a roller or roller skids. Depending on the application, there are two sizes to choose from, each with two versions (with and without system perforation). The tables with system perforation (20 mm) have a circumferential aluminium profile, which also offers additional possibilities for fixing components.

Product	Technical details	Description	Article no.	Price
WorkMo worktable	Dimensions: 648 x 1,451 x 18 mm Weight: 8.75 kg	Enclosed worktop. Large work area.	1000003700	305.20 EUR

WorkMo perforated worktable	Dimensions: 648 x 1,451 x 19 mm Weight: 24.6 kg	With system perforation (20 mm). Continuous aluminium profile. Large work area.	1000003701	421.30 EUR
-----------------------------	--	---	------------	------------

Product description		Article no.	Price
	Transport set for WorkMo worktable Dimensions (WxDxH): 526 x 124 x 112 mm Weight: 1.8 kg Complete set for transporting the worktable as part of a mobile workplace. Suitable for WorkMo combinations 2 x 24-500 or 1 x 24-750. Cannot be combined with roller skids.	1000003775	30.70 EUR
			

Worktops – Work when and where you want

Side panel accessories – For even more benefits

The worktop made from high quality beech-Multiplex provides an ideal work surface for both general and delicate tasks. The panels can be attached to the top surface of the WorkMo using a latching mechanism and can easily be removed again if necessary. The perforated design permits a wide range of attachment options when machining workpieces.

WorkMo worktops

	WorkMo Fix Dimensions (WxDxH): 155 x 66 x 9 mm Weight: 0.78 kg Load securing package for all WorkMos in the vehicle. Suitable for Sortimo protection floors 9 mm in thickness. Must be milled into the vehicle floor and is thus recessed flush with the floor.	1000004978	29.60 EUR
	WorkMo belt guide PU2 Dimensions (WxDxH): 15 x 300 x 75 mm Weight: 0.4 kg Ensures the optimal position of lashing belts. Easy to use by inserting into the WorkMo.	1000005129	18.60 EUR

Flexible load securing on the vehicle roof.

TopSystem

Sturdy and corrosion-resistant thanks to high-quality stainless steel and aluminium components.

Easy load securing due to the optional, integrated ProSafe lashing system.

Flexibility for expansion with extensive accessories.

Time-saving and ergonomic loading and unloading of cargo.

TopSystem – Flexible load securing on the vehicle roof

Basic carrier

Cross members with integrated ProSafe lashing system

Accessories

Side support cross member

- extension for the basic carrier
- side limit stop for cargo
- flexible mounting positions

Side rail

- extension for the basic carrier
- continuous closure of the cross members creates additional stability
- side limit stop for cargo
- aerodynamic contour
- please consult the vehicle tables for the required length of the side rails

Loading roller

- simplifies loading: cargo can be pushed onto the TopSystem from the rear of the vehicle
- time-saving and ergonomic loading and unloading of cargo
- prevents damage to the vehicle and cargo
- has a bearing load of up to 50 kg
- please consult the vehicle tables for the required dimensions of the appropriate loading roller

Your advantages

- safe transport of long, bulky goods
- high payloads thanks to a low net weight
- aerodynamic contour ensuring low wind noises and fuel savings
- unique load securing options with the optionally integrated ProSafe lashing system
- flexibility for expansion with versatile accessories
- corrosion-resistance and durability thanks to high-quality stainless steel and aluminium components

ProSafe

- **Integrated system**
Versatile application options in load-securing floors, van racking systems, the Sortimo TopSystem as well as the original lashing points from the vehicle manufacturer.
- **Everything from a single source**
Sortimo offers you a complete system: lashing options and suitable accessories from one source.
- **Simple and secure**
Easy and quick utilisation saves time and ensures a secure hold of your cargo.

TopSystem – Flexible load securing on the vehicle roof

Rear ladder lift

The rear ladder lift can bear a ladder weight of up to 51 kg. It lifts ladders conveniently onto the vehicle roof with the aid of pressure cylinders. There the lift locks audibly into the end position. The ladder is load secured when it is folded, therefore the height poses no problem. As a result the user does not have to climb onto the roof in order to secure the ladder.

Designation	Dimensions (WxDxH) / weight	Article no.	Price
Rear ladder lift 2500 mm	Dimensions: 2,600 x 480 x 155 mm Weight: 31.0 kg	1000000193	1,405.00 EUR
Rear ladder lift 3000 mm	Dimensions: 3,100 x 480 x 155 mm Weight: 34.0 kg	1000000194	1,512.50 EUR

TopSystem – Flexible load securing on the vehicle roof

Ladder side lift

Advantages at a glance:

- time-saving and ergonomic loading and unloading of ladders
- space-saving, side access to the ladder, no space required at the rear of the vehicle
- reliably prevents errors when securing ladders
- easily convertible to a different ladder size

easy operation, system locks and secures the ladder automatically

fully rubberised surfaces in the limit stop area for the ladder

suitable for 1-, 2-, or 3-stage ladders; max. ladder length up to 1.5 times the length of the cross member spacing of the TopSystem; the cross member spacing can be varied from 1380 to 3000 mm

- up to 35 kg load
- flexible and simple assembly
- can be mounted on both sides
- weatherproof
- net weight of only 20 kg
- suitable for vehicles that have a height of 2.0 m (e.g. MB Vito H1 & VW T6 H1)

of the use of
high-quality films

One-stop shopping –
everything from a single
supplier

mySortimo graphics – Online configurator for vehicle decals

Vehicle decals are a simple and very effective way of increasing the awareness of your company. Reach a large number of potential customers at a reasonable cost. Vehicle decals also represent a sensible addition to your other marketing activities and are a cost-effective sustainable alternative to newspaper advertising, posters and radio advertising. Decals last for many years if they are applied professionally. They mean that you can reach your target group over a long period without additional expenditure – especially if you are driving around in the region every day.

Your vehicle is your company's mobile business card and plays an important role in drawing your company to the attention of existing and potential customers and partners. Make the most of this potential for a professional presence and be noticed. Configure your personal vehicle decals right now, quickly and simply on the computer using the online configurator from mySortimo graphics.

Effective marketing

Make an impression and get yourself noticed. A professional presence allows you to reach potential customers every day and increase your turnover.

Professional templates

Various templates to get you quickly started. Generate relevant designs quickly and simply without the need for specific knowledge of graphics.

Full cost control

You will have the current price in view during the design process and you decide yourself how extensive your decals need to be and how much you want to invest.

Everything from a single source

Benefit from the Sortimo complete service. Save time through reduced downtimes and head off to the next job with your personally branded vehicle.

mySortimo graphics – Online configurator for vehicle decals

The quickest and simplest way to design your personal vehicle decals.

You want to use your vehicle as a mobile advertising surface and thus generate more awareness for your company, contact potential customers and achieve increased turnover. Professional vehicle decals are the ideal solution. However, historically the option for getting decals on a vehicle has been associated with lots of time and expense.

mySortimo graphics – the online configurator for vehicle decals by Sortimo – makes designing and ordering your individual advertising decals simpler than ever before.

Design your vehicle yourself in just a few steps whenever you want. mySortimo graphics makes it possible in very little time using templates and vehicle-specific editing areas. Prolonged discussions with service providers are a thing of the past and you are completely independent of business hours as it is permanently available.

Sample price:
Volkswagen T6, wheelbase 3000 mm, normal roof
Decals incl. application on all four sides of the vehicle

approx. 750 €

All costs shown in mySortimo graphics include application of the films.
You determine the price yourself depending on the design: from around 100,00 € for small lettering to 1,000,00 € for elaborate designs with photos and digital prints, you can easily adapt your vehicle decals to your budget.

Quick & easy

- 1 Enter contact data / advertising text
- 2 Choose colour
- 3 You're done!

Individual & creative

- 1 Select the template
- 2 Edit the text
- 3 Customise the colour
- 4 Add your own graphics
- 5 Design all views
- 6 You're done!

Vehicle decals entirely in accordance with your wishes

In the mySortimo graphics online configurator, choose either the “quick & easy” or “individual & creative” design options. In the “quick & easy” solution, simply enter your required advertising data and then choose the colour of the film. The text is automatically placed in the optimum position on the vehicle – you just need to place the order. If you would like to further customise the decal, you can add the finishing touches to your design using the many functions in the editor. The editor offers even more possibilities for an eye-catching vehicle design. Create your preferred personal decals, even without any knowledge of graphics, based on the various different templates and defined editing areas. Intuitive operating elements can be used to edit the text of the decals, shapes and your own graphics can be added, and the colour of the film can be changed. The all-round design can be achieved by simply changing the view from the passenger side to the driver's side and between the front view and the rear view, letting you design your vehicles to meet your precise requirements.

Compare the design of your decals with your planned budget. The total cost of the vehicle decals with film production and application to your vehicle is available to view at all times using the dynamic price indication in the online configurator. The production of your vehicle decals uses only high-quality films from leading manufacturers with excellent adhesion and outstanding quality. The materials are UV-resistant and weatherproof. Durability is between 5 and 7 years, depending on the effects of weathering and care. The decals can, of course, be removed from the paint on your vehicle without leaving any residues.

Individually configurable foam inlays

mySortimo inlay

100% perfect fit for
Sortimo containers.

Easy planning of your inlays
via online configurator.

Custom-made for you even
in the smallest quantities.

Systematic organisation
inside your containers.

mySortimo inlay – Individually configurable foam inlays

Configure online & order directly at
www.mySortimo.com/inlay

With *mySortimo inlay* you can tidy your BOXXes, cases and drawers. This means that – in line with 5S workplace organisation – everything is in its place and is quickly at hand for you at all times. This reduces unproductive time spent searching for things and optimises your daily work routine.

The two-colour combination of blue base body and black top layer allows missing parts and tools to be quickly identified. This prevents the loss of expensive tools and saves you unnecessary replacement and other costs. Your tools are ideally protected from damage in the robust foam inlays.

Quality

- perfect fit for Sortimo BOXXes, cases and drawers from the Sortimo van racking system and the WorkMo
- sturdy, high-quality material
- easy to clean
- odourless

Benefits

- protects your tools from damage
- creates a perfect overview
- tools always ready to hand
- increases your productivity
- prevents loss and expensive replacement

mySortimo inlay – Individually configurable foam inlays

Bring your productivity to the next level! With mySortimo inlay foam inlays, we offer you a 100% custom solution for enhancing your Sortimo BOXXes, cases and drawers from the Sortimo van racking system – adapted to your needs.

You can use the online configurator to create custom foam inlays with optimal fit in just a few steps. Simply enter the tools you have using a smartphone or digital camera and design the interior of your container using various alignment and positioning functions. Manage your foam inlays in your mySortimo account, from where you can make adjustments or re-order inlays at any time.

The mySortimo inlay online configurator

- intuitive, custom design
- 24/7 – available around the clock
- no software installation necessary
- full price transparency
- can be ordered directly online
- 100% perfect fit for Sortimo containers
- manage stored and ordered configurations
- fast delivery thanks to process optimisation

Five steps to your custom foam inlay:

1

Select container
BOX, case, drawer.

2

Print photo template
Download and print A4 or A3 format photo template.

3

Enter tools
Place tools on the photo template and take pictures with your smartphone or digital camera.

4

Object recognition
Load photos from your computer into the configurator and edit the detected contours if necessary.

5

Configure & order inlay online
Place and arrange captured objects on the selected inlay in the configurator. Finally, add recessed grips for easy removal and order directly online.

Set in order and standardise

mySortimo labels

KEEPS THINGS TIDY – custom labelling prevents duplicate inventory management

QUICK ACCESS – improved clarity of contents thanks to Sortimo colour code

SAVE TIME – consistent labelling cuts down time to refill contents

CONFIGURABLE – turnkey ordering with SR5 van racking

SR5 – mySortimo labels

With mySortimo labels it is possible to gain an even greater added value in the standardisation and systematisation of the mobile working day. Following hand-over of a vehicle with van racking, there is often no time to label the rack components by hand. A carefully planned configuration combined with custom-fit labelling of the racking forms the basis for simplified and productive workplace organisation in our daily world of work. Thanks to mySortimo labels, this is done in the form of labelling that is custom-printed and applied to the desired components of the SR5 van racking and delivered at the same time, ready to use. Carrier clips allow labels to be rearranged quickly and at any time across all components of the SR5 van racking system.

With the integration of cutting-edge methods of workplace organisation to meet the 5S standard, such as the Sortimo colour code, mySortimo labels are helping to ensure even greater productivity and efficiency in the daily routine. The selection of colour codes for the labels is a very easy way of organising work materials in a standardised manner so that they can be immediately identified by every employee thanks to visual col-

our coding. The use of colour codes indicates what the material belongs to, e.g. by type, purpose or persons. This code can be customised accordingly from a range of six colours.

Writing on the label then allows the specific contents to be subdivided further. Setting standards for labelling makes it considerably easier for staff to select the right materials from the stockroom and the van racking and to put them in their proper place in the vehicle. This is particularly helpful when vehicles are used by more than one person.

A further benefit is that sorting simplifies and speeds up the replenishment process. mySortimo labels ensure that materials that are about to run out or have already run out are noticed early on and can be reordered in good time.

Sortimo colour code

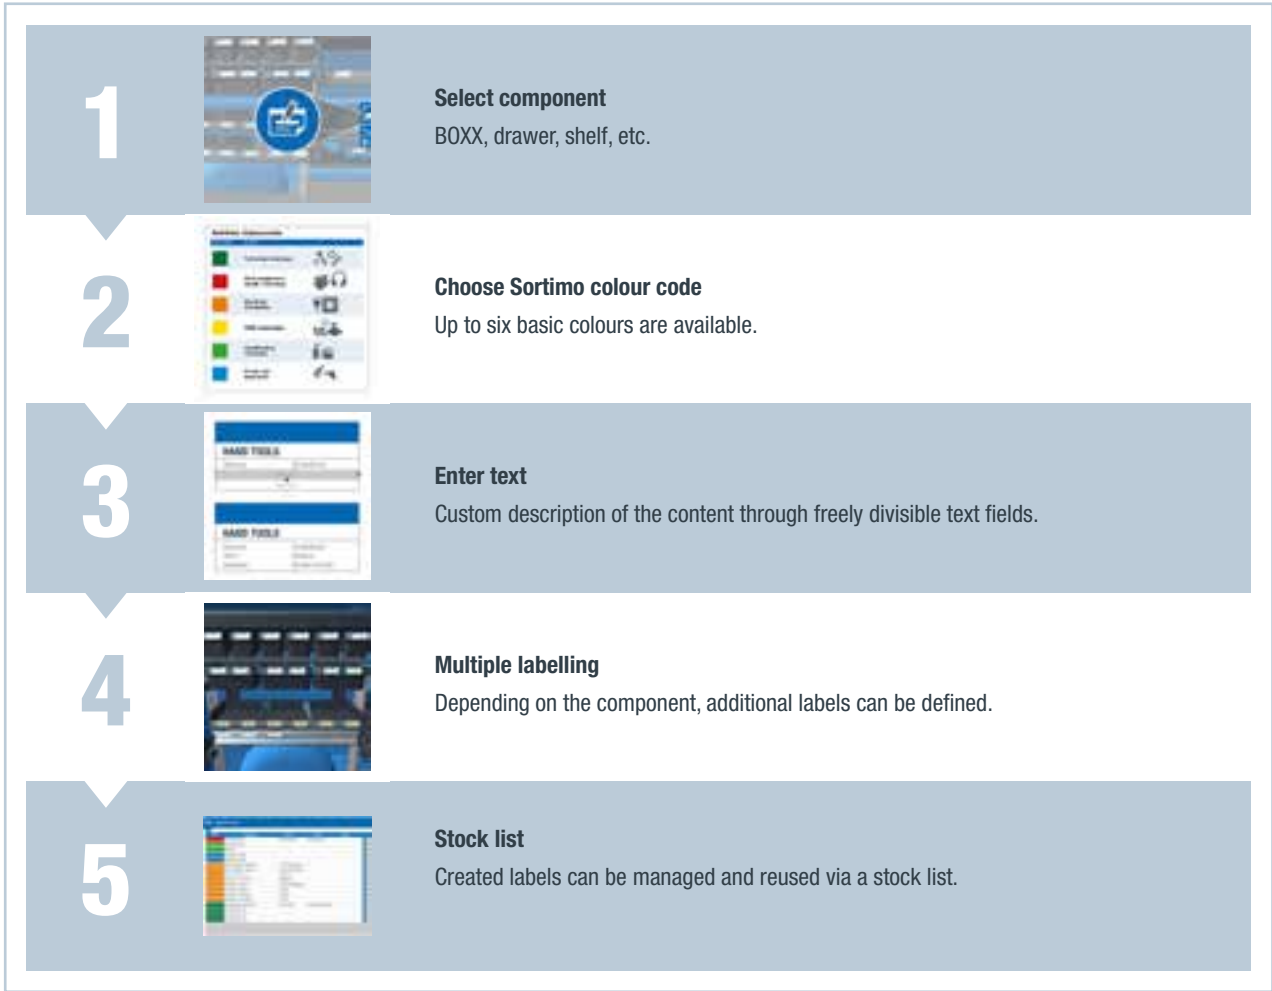

Organisation of the materials by type, purpose or category. Sortimo offers optimal help for this:

Colour code	Main category	Sub-category
	Fastening material	Wall plugs, screws, washers, circlips, nuts, rivets, pipe clamps, cable clamps, etc.
	Work equipment / Health and safety	Load securing, laptop insert, work gloves, safety glasses, high visibility vests, hearing protectors, respirators, etc.
	Electrical installation	Terminals, heat-shrink tubes, ferrules, switches, plugs, sockets, fuses, etc.
	HVAC installation	Valves, screw plugs, sealing rings, fittings, clamps, O-rings, filters, controllers, etc.
	Construction chemicals	Silicone, glue, sealants, adhesive tape, cleaning agents, lubricants, etc.
	Power and hand tools	Drills, cordless screwdrivers, angle grinders, hammers, pliers, screwdrivers, spanners, etc.

Configure online & order directly at
www.mySortimo.com/labels

Five steps to your complete vehicle labelling:

SR5 – mySortimo labels

For labelling the SR5 van racking as well as the BOXXes and cases, the labels are also available as a Print@Home solution outside the van racking configurator. The labels are available on pre-printed sheets in the six basic colours of the Sortimo colour codes and can be individually labelled from the comfort of your own home. PDF templates help you in this process. These can be downloaded free of charge from mysortimo.com/labels. In combination with the SR label clip, all components of the SR5 van racking system (SR-BOXXes, drawers and shelves) can be optimally labelled.

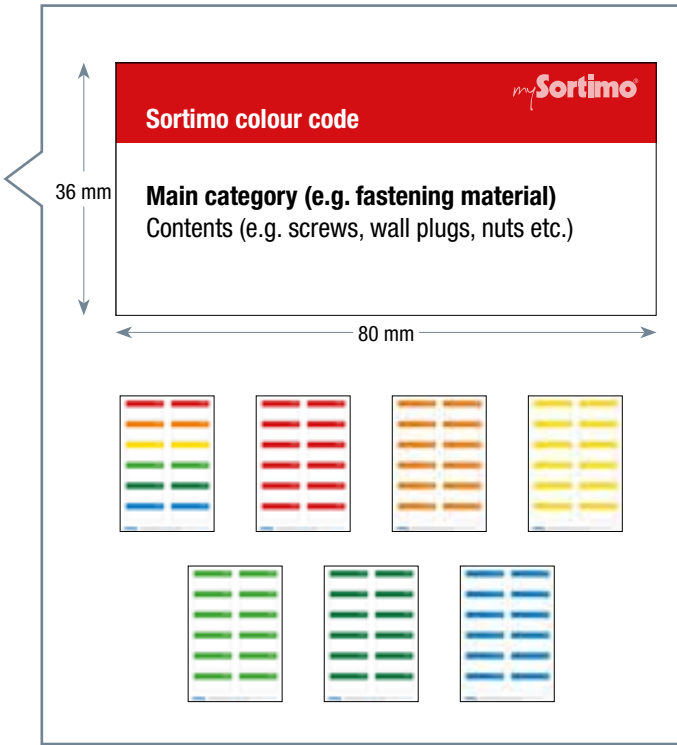

Product description		Article no.	Price
	SR label clip Dimensions (WxDxH): 82 x 19 x 32 mm	6000011976	0.60 EUR
	can be used for SR-BOXXes, open shelves with border SR5 and drawers SR5 secure hold for labelling flexible replacement or displacement when changing the vehicle equipment		
			
			

Labelling SR

For SR5 open shelves with border, SR5 drawers and BOXXes.
You will need an SR label clip when using SR-BOXXes and SR5 components.
